Pond Clarifying Natural Bacteria

Net Contents: 24 lbs • 10.8 kg
Why is PondClear™ so important for my pond’s health?

Water clarity problems are caused by rotting vegetation, leaves, twigs and fish waste that have accumulated in your pond. PondClear™ is a special blend of highly concentrated beneficial bacteria designed to promote a clean and healthy ecosystem. PondClear™ works by consuming suspended organics and converting them into an odorless gas that safely escapes unnoticed out of the water column. In just a few weeks after your first application, you will begin to see a noticeable difference in water clarity.

Why is PondClear™ so important for my pond’s health?

HOW TO APPLY: DO NOT OPEN PACKETS!
Packets are to be applied directly to the water. Distribute packets from shore or boat. PondClear™ works best when evenly disbursed across the body of water.

WHEN TO APPLY: Apply every two weeks when water temperatures are above 50°F. Wait three days after an algaecide and/or herbicide treatment to apply PondClear™.
