- Adds Beneficial Electrolytes
- Effective Against Many Parasites & Diseases
- Provides a Natural Protective Slime Coat

QUICK DOSE CHART

WITHOUT AQUATIC PLANTS:
Use 2-1/2 cups per 100 gallons of water.

WITH AQUATIC PLANTS:
Use 1-1/4 cups per 100 gallons of water.

WHEN TREATING FOR DISEASE:
Isolate the fish into another tank with vigorous aeration and use 5 cups per 100 gallons.

CAUTION: Many common salts can be harmful to fish, only evaporated sea salt should be used in ponds containing fish. When using in ponds containing aquatic plants, use a smaller dose.
