

Features

- Pressure rated 232 PSI (16 Bar) at 73°F (23°C)
- Full Port design for unrestricted flow
- Energized PTFE ball seats for extended life and lower torque
- Leak free dual stem seal design
- Union nut locking device prevents back-off
- Micro-adjustable ball seat carrier
- Fully machined ball and stem connection
- Actuator ready with optional mounting kit
- Certified per NSF372 and NSF61 for potable/drinking water

Applications

Industrial quality full port PVC ball valves are typically used for control of water and other media compatible with the materials of construction (not suitable for compressed air or gas). Ideal for industrial applications and where NSF approved construction is required for potable drinking water. Valves can be manually operated or mounted to air or electric actuators using optional ISO5211 mounting kit.

Operation

Turning the valve handle one quarter-turn (90°) rotates the ball from closed to the full open position. Easy mounting and maintenance with true union pipe connections. For plumbing convenience, 1/2 to 2 inch sizes include both IPS glue socket and female NPT end connectors. Larger sizes include IPS glue socket end connectors.

Construction

Valve Body	PVC cell class 12454 per ASTM D1784 (dark gray)
Ball and Stem	PVC cell class 12454 per ASTM D1784
Handle	PVC cell class 12454 per ASTM D1784
Ball Seats	PTFE (Teflon) energized with EPDM or FPM (Viton) seals
Stem Seals	Dual EPDM or FPM (Viton) seals
End Connectors and Lock Nuts	PVC cell class 12454 per ASTM D1784
Union Nut Locking Device	POM

Description

Industrial grade PVC ball valves offer a variety of advanced features in a wide range of 1/2 through 4 inch pipe sizes. Energized PTFE ball seats are used to extended cycle life, compensate for wear and lower the operating torque. Union locking device prevents nuts from backing off due to vibration or thermal cycling. Dual stem seals and adjustable ball seat carrier contribute to a leak free design. Machined ball and stem connection after molding provides a precise fit.

Approvals

- NSF International certified to:
 - NSF/ANSI 372 Drinking Water
 - NSF/ANSI 61 G
- ANSI B1.20.1
- ASTM D1784, cell class 12454

Options

- Electric actuators
- Air Actuators
- Wall/Base Mounting Kits
- Actuator Mounting Kits

Construction Features

Leak free dual stem seal design

Fully machined ball and stem connection

1/2 to 2 inch sizes include both IPS glue socket and female NPT end connectors.

Full port design for unrestricted flow

Energized PTFE ball seats for reduced torque and extended cycle life

Durable handle

Actuator ready with optional ISO5211 mounting kit

Union nut locking device prevents back-off from vibration or thermal cycling

1/2 to 2 inch Sizes

Certified per NSF372 and NSF61 G for potable / drinking water

Pressure/Temperature

Pressure Rating*: 232 PSI (16 Bar) at 73°F (23°C)

Vacuum service to 29inHg at 73°F (23°C)

Temperature Rating: 32 to 140°F (0 to 60°C)

*See P/T chart

2-1/2, 3 and 4 inch Sizes

Pressure/Temperature Chart
