

Features

- Quarter turn (90°) operation with mechanical travel stops
- Type 4X/IP67 weatherproof aluminum alloy enclosure
- Highly visual dome style valve position indicator
- Manual override
- ISO5211 multi-flange valve mounting
- Heavy duty motors with overload protection
- Thermostatically controlled anti-condensation heater
- Two auxiliary limit switches included with on-off units
- Self-locking all metal gear train, no additional brake required
- EPS- Electronic Positioner models available
- Approvals - CSA listed per UL429 and CSA C22.2

Applications

Industrial quality electric actuators typically used to automate quarter turn (90°) ball valves, butterfly valves and dampers. The 5618 series actuator is quick and easy to install with standard ISO5211 multi-flange mounting and a double square drive.

Operation

Electric actuator uses power-to-open and power-to-close, stays in the last known position with loss of power. On receipt of a continuous voltage signal, the motor runs and via a rugged all metal gear system rotates 90°. The motor is automatically stopped by internal cams striking limit switches. On receipt of a reversing continuous signal, the motor turns in the opposite direction reversing the output drive position. Actuators with EPS positioner use an analog input signal to control the drive output position. Rugged self-locking all metal gear train eliminates the need for additional braking.

Construction

Enclosure	Anti-corrosive durable painted aluminum alloy, Type 4X/ IP67
Output Drive	ISO5211 aluminum alloy, female double square
Visual Position Indicator	Yellow with transparent clear dome cover
Gears	Heat treated steel and aluminum bronze, self locking
Fasteners	Stainless Steel
Electrical Connections	Terminal strip, cable connectors, optional 1/2" NPT adapters
Manual Override	Standard hex wrench (included) with protective cover
EPS Positioner Models	Fully potted control module

Description

Excellent power to size, performance packed electric actuators take the valve automation industry to the next level. Features include rugged motor integral to actuator housing, all metal gears, manual override for emergency hand operation, visual valve position indicator and Type 4X/IP67 weatherproof enclosure. Actuators are certified by CSA per rigorous UL and CSA standards, and also comply with the CE marking. On-Off units include two auxiliary dry contact limit switches used to confirm valve position. Anti-condensation heater is standard and will help protect against condensation build-up inside the actuator.

Approvals

- CSA Listed per UL429 and CSA C22.2 No. 139-13
- CE conformance- EN 60204-1:2006
- Weatherproof actuator enclosures are Type 4X and IP67

Electric Actuators

Valworx quarter turn electric actuators use power-to-open and power-to-close, stays in the last known position with loss of

EPS - Electronic Positioning System

Valworx electric actuators with EPS Electronic Positioning Systems provide an accurate valve positioning function whereby the movement of the actuator is controlled by a 4-20mA input control signal. Any change in the control input signal results in a corresponding and proportional change in the position of the actuator.

This is achieved with a unique built in electronic positioning module. The module is fully potted to help protect the electronics from vibration and moisture resistance.

An internal microprocessor on the EPS circuit board continuously monitors the analog input and output signals and compares them to the physical position via a precision potentiometer feedback system, moving the actuator output as required to balance the signals.

The EPS system is self-calibrating which virtually eliminates "hunting" and provides a 4-20mA output monitoring signal as standard. The following features are standard on the EPS module:

- Adjustable forward or reversing action. Ex: standard 4mA close/20mA open or selectable 4mA open/20mA close
- Deadband adjustment from 0.5%-5.0%
- Selectable fail mode: fail closed, fail open or stop in place. This is not for loss of power, but for loss of input command signal.
- Electric manual control on control module
- Fault LED lights indicate valve jam or signal loss
- Power on LED

Type Operation	EPS - Electronic Positioning System
Max Torque	200Nm/ 1770 in lbs
Voltage	24 VDC +/-5%
Input Command Signal	4-20mA
Output Monitoring Signal	4-20mA
Current - Full Load Amps	3.57 A
Working Time (0-90°/no load)	30 sec
Duty Cycle	70%
Enclosure	Painted aluminum alloy
Enclosure Protection	Type 4X (IP67) weatherproof
Electrical Connections (2)	Cable connector (optional 1/2 NPT)
Working Angle Std°	90°
Temperature Range	-13 to 131 °F (-25 to 55 °C)
Motor Protection	Thermal overload
Motor Limit Switches	2 x SPDT
Anti-condensation Heater	4 watts
Manual Override	Hex wrench
Valve Mounting per ISO5211	F07, F10
Output Drive DIN3337	22mm (female double square)
Weight	20.0 lbs (9.0 kg)

CSA Listed to UL429
and CSA C22.2 No.139
