

Features

- Industrial quality miniature actuator
- Full Port direct mount 3-way stainless steel ball valve
- Visual valve position indicator
- Rugged aluminum Type 4X and IP67 weatherproof enclosure
- Heavy duty motor with overload protection
- Manual override
- Two auxiliary limit switches used to confirm valve position
- PTFE ball seats for longer life
- Triple PTFE/Viton live loaded stem seals, adjustable
- Valve anti-static device
- Silicone free valve
- Actuator approvals by CSA and/or CE

Applications

Electric actuated flow diverter or selector valves are typically used to control the flow of water, air, oil and other media compatible with the materials of construction. Working pressure 1000 PSI at 100°F (38°C). Suitable for media temperatures up to 266° F and steam up to 25 PSI with optional high temperature kit. Vacuum service up to 29"Hg. Actuator designed for 60% duty cycle.

Operation

Electric actuated valve uses power-to-open (Pos. 2) and power-to-close (Pos.1), stays in the last known position with power failure. On receipt of a continuous voltage signal, the motor runs and via a rugged all metal gear drive rotates the ball 90°. The motor is automatically stopped by internal cams striking limit switches. On receipt of a reversing continuous signal, the motor turns in the opposite direction reversing the valve position. Electrical connection by prewired cable with flying leads (3 meter/9.8 feet)

Construction

Valve Body	316 stainless steel ASTM A351 CF8M
Ball/Stem	316 stainless steel
Ball Seats	PTFE (Teflon)
Stem Seals	PTFE / Viton
Anti-static Device	Ball to Stem (1/4" - 1-1/2") + Stem to Body (1-1/4 - 2")
Gear Drive	Rugged all metal flat and worm gears, self locking
Actuator Enclosure	Anti-corrosive aluminum alloy, Rated Type 4X/ IP67
Visual Valve Position Indicator	Yellow indicator with transparent clear cover
Fasteners	Stainless Steel
Auxiliary Limit Switches	2 x SPST (3A@125/250VAC,30VDC resistive load

Description

Electrically operated Full Port 3-way L-type flow pattern ball valve has four PTFE ball seats allowing for full pressure at any port. Leak free triple PTFE/FKM stem seal design. Features include compact size, rugged motor integral to actuator housing, all metal gears, manual override for emergency hand operation, visual valve position indicator and Type 4X/IP67 weatherproof enclosure.

Approvals

Actuators

- Actuators certified by CSA and/or CE
- CSA models certified to UL429, CSA C22.2 and UL50E Type 4X enclosure
- CE models include ISO5211 mounting and IP67 enclosure

Valves

- CE mark per PED 97/23/EC
- Pressure Tested per API-598
- MSS-SP-55

Construction Features

Rugged aluminum corrosion resistant Type 4X/IP67 weatherproof enclosure

Heavy duty integral motor design significantly reduces physical size of actuator

Electrical connection by prewired cable (3 meter)

Triple PTFE/ FKM(Viton) live loaded stem seals design, adjustable

316SS Ball and Stem, PTFE ball seats

Auxiliary Limit Switches(2) for confirming valve position,

Self-locking all metal gear drive, no additional brake required

Manual Override with protective cover

Direct mount ISO5211 flange, no brackets required

Full Port 316 stainless steel 3-way ball valve

Visual Valve Position Indicator

Pressure-Temperature*

Pressure Rating: 1000 PSI (69 Bar) non-shock
 29" Hg vacuum, 25 PSI steam with high temp. kit

Media Working Temperature: 0 to 158° F (-18 to 70° C)
 Media temperatures up to 266° F (130° C) with optional high temp. mounting kit

Ball Valve Temperature Rating: -4 to 325° F (-20 to 163° C)

Actuator Temperature Rating: -22 to +140° F (-30 to 60° C)

*See P/T chart

Electric Actuated 3-Way L-port Valves

Valworx electric actuated 3-way L-Port valves use power-to-open (pos.2) and power-to-close (pos.1), stays in the last known position with loss of power. The actuator will rotate the output drive 90° to change the position of the ball valve. Limit switches automatically stop the motor/gear drive in either position 1 or position 2 as required.

Two auxiliary limit switches are provided as standard to confirm valve position.

Rugged gear drive system is made of all metal, self-locking, no motor brake required. A manual override is provided for use in setup or power failure situations.

A manual override is provided for use in setup or power failure situations. The override is operated with a standard hex wrench (included).

Robust aluminium alloy housing is corrosion-resistant and weatherproof. The enclosure is rated Type 4X and IP67. Heavy duty motor is integral to the actuator housing providing a small physical size to power ratio.

Electrical wiring is by prewired cable with flying leads (3 meters/ 9.8 feet).
