

Features

- Three wire conductors including yellow/green Ground 
- Individually numbered wires
- UL approved for direct burial, sunlight and oil resistant applications
- Easy strip Black PVC cable with Nylon insulation
- 16 foot length

Operation

Cable is run directly into the conduit cable connector of the 5291/5292 Series Valworx direct mount solenoid valve. 5291/5292 DIN cable connectors are included on Valworx solenoid valves, and thread into industry standard 1/2" conduit, effectively sealing cables from installation environment and water ingress.

Note: Valworx solenoid valve flat wiring pins are not polarity sensitive.

Description

Solid construction for super durability and resistance to harsh environments. Impact resistant with greater cable strain relief.

Approvals

Applications

Simplify wiring 5291/5292 series Valworx solenoid valves with Valworx 3 conductor cable. In conjunction with solenoid conduit cable DIN connectors, this cable provides a secure installation, offers many technical advantages and saves installation time, labor and cost.

Voltage/Temperature

Voltage Rating: 0-600V AC/DC

Temperature Range: -13 to 194° F (-25 to 90°C)

Specifications

Max. Voltage AC/DC	Cable Type	Wire Size (AWG)	Cable O.D (mm)	Cable Length (feet)
600V	PVC	18	7.5	16
