The Alliance-mx encodes video using Main Profile H.264, the most efficient video compression available, resulting in a smooth, high-quality image, low network bandwidth utilization, and reduced storage costs. Requiring less than 4.0 W PoE, the Alliance-mx is highly energy-efficient and economical. A movable day/night IR filter and choice of lens enables field-of-view adaptability for a wide range of settings and applications. ONVIF and PSIA compliant APIs provide the necessary flexibility to ensure compatibility with many of the most popular VMS platforms.
