12MP SENTINEL CAMERA

12MP/4K Outdoor IP Camera

This next generation 12MP Sentinel camera provides multiple, individually configured H.264 and simultaneous M-JPEG streams with support for 12 MP and 4K resolutions. The high-performance Sentinel provides the following benefits:

Superior Resolution: Offers 6 times the pixels available in a standard 1080p HD camera, capturing wider scenes and forensic detail from a greater distance.

Easy to install and integrate: Wall, ceiling, parapet mounting options, rugged aluminum construction, heater and IP66 weather resilience allow the camera to be installed in the harshest of environments. An integrated back box provides ease of installation. At less than 8W power consumption, the Sentinel can be fully operational using only PoE.
