**BODY //**

U.S. Contractor [REDACTED]

In brief, the facility in LCF California reported corruption in image files (see example) and our analysts insist that our contract with you must be expanded as soon as possible to prevent further errors. To that end, I am authorized at this time to immediately allocate funds for our current service to be upgraded to a level eight (L8) package. In addition, we are willing to negotiate a commitment for future provisioning to address additional urgent upgrades.

This upgrade commitment is entirely dependent on your ability to ensure that loss of data and corruption will not be a concern going forward.

We have multiple models to test out this summer in order to be ready for shipment on time. We hope you can provide us the necessary upgrade in your current network and avoid additional disruptions to our project and schedule.

Respectfully yours,

[REDACTED], Administrator of [REDACTED]
