

How to post images on the WB Forum. Use jpg, gif, png formats

When you are in posting mode... click the picture icon

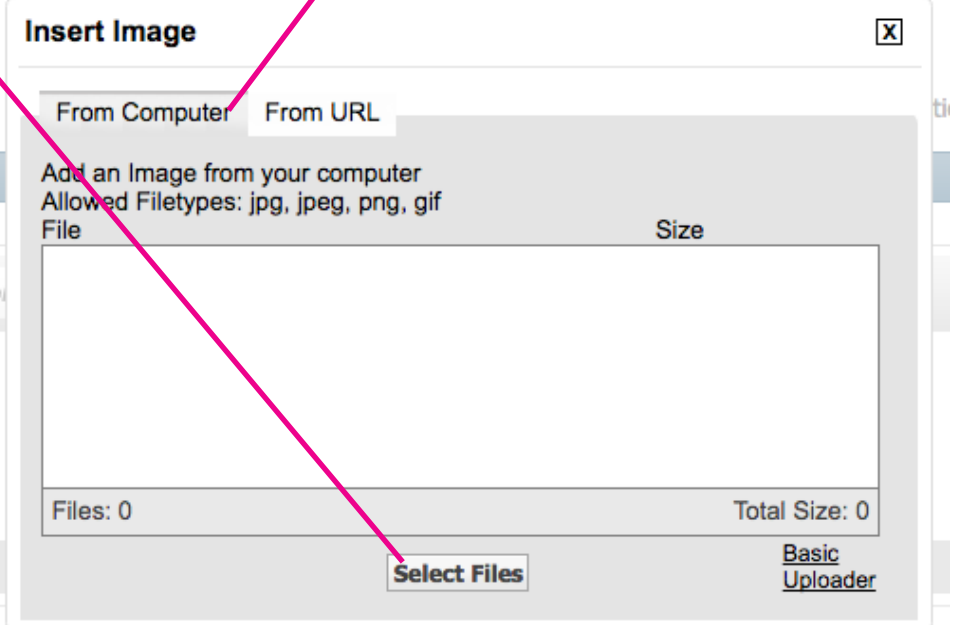

1

If you have the image on your computer, select the From Computer tab, if from another site, select From URL tab

Click the Select Files button

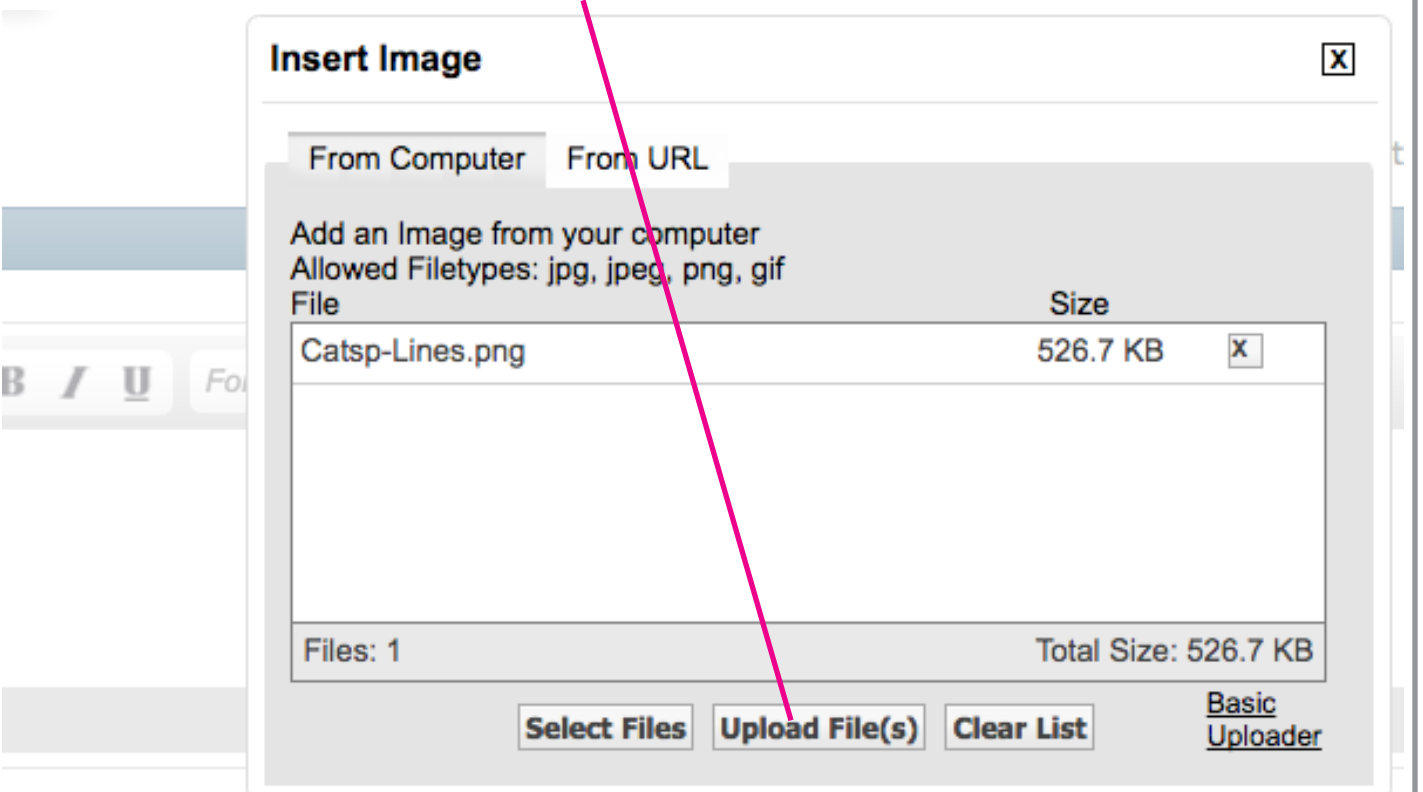

+ Reply to Thread

Quick Reply

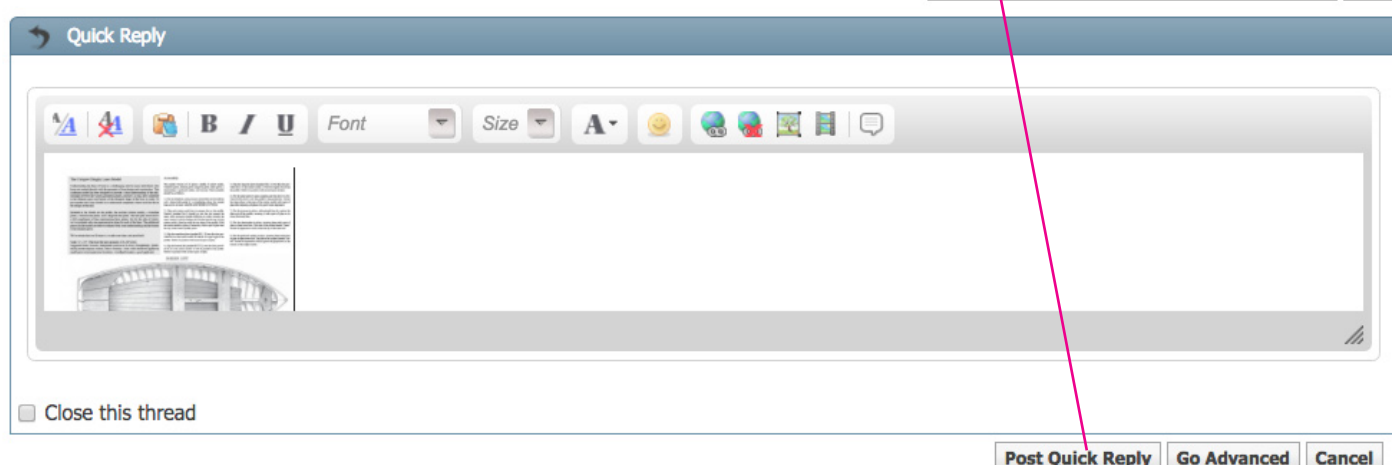

2

After hitting the Select Files button the field will populate. You need to know where your files live. Select the file, and click the Upload Files button.

3

Now you'll see a thumbnail of your image. After you click "Post Quick Reply" it will post and the image will be large.

4

If you decide to post what is deemed inappropriate, you will lose your posting privileges. If it's not appropriate for your 10 yr old daughter, it doesn't belong here.

Do we guarantee the images will be there forever and always? No. So you'll want to keep copies of what you post.
