DIRECTIONS FOR USE

SPRAY METHOD: Apply direct concentration with foaming tip spray bottle (not included). Allow product to come in contact with treated surface for 10-30 seconds. Remove excess product with soft cloth and rinse with clean water.

SOAK METHOD: Mix 1 part D-Scale with 9 parts water. Soak equipment for 1-3 minutes then remove from solution and rinse with clean water. Repeat if necessary.

D-Scale is a stronger, safer alternative to using dangerous cleaners like hydrochloric or muriatic acid. The DfE (US EPA Designed for the Environment) approved formula doesn't release harmful chemical fumes and will biodegrade in 10 days or less. D-Scale is approved for direct environmental discharge, is noncorrosive, nonhazardous, not regulated by US DOT or Canadian TDG.

WARNING - KEEP OUT OF REACH OF CHILDREN

Wear protective eye wear. In the event of eye contact rinse eyes with water. D-Scale should not be used on concrete, masonry, marble, aluminum, zinc and galvanized metal. Extended exposure or soaking in product may cause stinging in open sores, cuts or around fingernails. Use of nitrile gloves is suggested.
