- 20" deep drawer box with stapled butt joint construction.
- Drawer bottom stapled into sides, front and back.
- Self-closing epoxy coated guides for smooth, quiet

action (Rated at 100 lbs capacity per drawer).
- Adjustable side-mount drawer guides with double rails for more stability.
- Built-in drawer stop.

1. Start Your Design

On a piece of paper and draw a rough outline of your room.

2. Measure your Room

Measure from the floor to the ceiling (measure soffit if applicable), the distance between walls, and from the corners to the trim of doors/windows. Mark the location of all electrical outlets, fixtures, ventilation, plumbing, gas connections, etc.

Measure the doors and windows from casing to casing, as well as the height and distance of each from the floor, ceiling and wall edges. 42" is needed below windows and electrical wall outlets to install base cabinets and countertop with backsplash. Mark all dimensions clearly on the planning grid and double check all measurements.

3. Add Cabinetry into Drawing

Using our cabinets listed inside this brochure, draw in cabinetry. (Draw walls on top of bases.) Include all appliances and fixtures that you plan to use in your space.

4. Total the number of Cabinets

Make note of cabinets needed on the product list for easy reference prior to purchasing.
