Accessorize your CPC Deluxe HD to create the ultimate telescope for astro imaging

- + **Nightscape** One shot color imaging camera with 10.7MP CCD sensor, mechanical shutter, TEC cooling and processing software.
- + **HD Pro Wedge** Provides a stable platform essential for polar aligning your fork arm telescope for smooth tracking all the way across the meridian.
- + **80 mm Guidescope Package** 600 mm focal length guidescope and ring package for piggyback guiding during astro imaging.
- + **NexGuide Autoguider** NexGuide stand-alone autoguider eliminates the need for a laptop computer for guiding during long-exposure imaging.

The wait is over! Celestron's award winning EdgeHD optical system is now available on a newly designed top-of-the-line dual fork arm computerized mount – The CPC Deluxe HD. Available in 8", 9.25" and 11" models, the CPC Deluxe HD telescope line re-defines everything that amateur astronomers are looking for – ease of use, quick and simple GPS alignment, improved ergonomics, enhanced computerization, unsurpassed optical quality and most importantly, affordability. As a visual instrument, the EdgeHD optical system delivers pinpoint images across your widest field eyepiece, providing you stunning clarity and sharpness that will leave you wanting more. When used for astro imaging with our new Nightscape or your own favorite CCD or DSLR camera, the EdgeHD optical system produces a flat focal plane allowing pinpoint stars to the very edge of your image. Own this premier telescope line today, and it will surely keep you up all night.
