This product contains a 3-volt lithium battery (#CR2032). It comes installed in the StarPointer finderscope. If swallowed, seek medical attention immediately, as the battery could cause severe injury or death in just two hours.

Because of the harmful chemicals contained within them, lithium batteries should be recycled. Do not dispose of the lithium battery with other household waste. Contact your local waste management or recycling center for instruction on how to recycle the lithium battery when it no longer provides adequate power to the StarPointer.
