1. General business description

Centerra Gold Inc. ("Centerra" or the "Company") was incorporated under the Canada Business Corporations Act on November 7, 2002. Centerra's common shares are listed on the Toronto Stock Exchange. The Company is domiciled in Canada and the registered office is located at 1 University Avenue, Suite 1500, Toronto, Ontario, M5J 2P1. The Company is engaged in the production of gold and related activities including exploration, development, mining and processing in the Kyrgyz Republic, Mongolia, Turkey, Russia, Cyprus and western Canada.

2. Basis of Preparation and Statement of Compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), using accounting policies consistent with those used in its consolidated financial statements as at and for the year ending December 31, 2013 and reflecting the new IFRS standards adopted as at January 1, 2014. These financial statements should be read in conjunction with the Company's December 31, 2013 annual consolidated financial statements.

These condensed consolidated interim financial statements were authorized for issuance by the Board of Directors of the Company on July 29, 2014.

Future Changes in accounting policies

The IASB has issued IFRS 9 *Financial Instruments* ("IFRS 9") which proposes to replace IAS 39 *Financial Instruments Recognition and Measurement*. The replacement standard has the following significant components: establishes two primary measurement categories for financial assets — amortized cost and fair value; establishes criteria for classification of financial assets within the measurement category based on business model and cash flow characteristics; and eliminates existing held to maturity, available-for-sale and loans and receivable categories. The IASB tentatively decided at its February 2014 meeting to select an effective date of January 1, 2018 as the effective date for the mandatory application of IFRS 9**.** However, entities may still choose to apply IFRS 9 immediately**.** The Company does not intend to adopt IFRS 9 in its financial statements for the annual period beginning January 1, 2014 but will continue to monitor and evaluate the impact of any required changes to its consolidated financial statements based on the characteristics of its financial instruments up to the date of adoption.

Adoption of New Accounting Standards and Developments

Effective January 1, 2014, the Company adopted IFRIC 21, *Levies* ("IFRIC 21"). IFRIC 21 is an interpretation of the accounting for levies imposed by governments which were accounted for under IAS 37, *Provisions, contingent liabilities and contingent assets* ("IAS 37"). IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event (known as an obligating event). The interpretation clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

Stockpiled inventory at Kumtor was written down to net realizable value at June 30, 2014 resulting from an increase in costs and lower production than anticipated. The cost of inventory in excess of what the Company believes can be realized after further processing and subsequent sale of the gold was $14.1 million and $14.6 million for the three and six months ended June 30, 2014 ($3.2 million and $3.2 million for the three and six months ended June 30, 2013) and is included in cost of sales, as disclosed in note 8.

The provision for mine supplies obsolescence was increased for the three and six months ended June 30, 2014 by $0.3 million and $0.6 million respectively ($0.2 million and $0.4 million for the three and six months ended June 30, 2013) which was charged to cost of sales, as disclosed in note 8.

The table below summarizes inventories adjusted for the provision for obsolescence:

7. Short-term debt

The Company has a $150 million revolving credit facility with the European Bank for Reconstruction and Development ("EBRD") from which it has drawn $76 million. This amount is due to be repaid on August 11, 2014. The Company has elected to extend the repayment date to February 15, 2014 pending EBRD's confirmation, which the Company expects to receive.

The terms of the Facility require the Company to pledge certain mobile equipment at Kumtor as security and maintain compliance with specified covenants including financial covenants. The Company was in compliance with the covenants as at June 30, 2014.

The amount of the short-term debt is presented net of unamortized deferred financing fees as shown below:

d. Share-Based Compensation

During the six months ended June 30, 2014, the Company implemented changes to the annual performance share unit plan for eligible employees at its mine sites. The new plan, which includes the same terms as the corporate performance share units, provides for eligible employees to be granted performance share units which now vest 50% at the end of the year after the year of grant and the remaining 50% the following year. The number of units which will vest is determined based on Centerra's share performance total return (for the sixty-one trading days volume weighted average share price, preceding the start and end of each performance period) relative to the S&P/TSX Global Gold Index Total Return Index Value during the same period. The number of units that vest is determined by multiplying the number of units granted to the participant by the adjustment factor, which ranges from 0 to 2.0. Therefore, the number of units that will vest and are paid out may be higher or lower than the number of units originally granted to a participant. The performance share units can be settled in cash or shares purchased in the open market at the option of the Company.

If the Company paid a dividend during the fiscal year, each employee will be allocated additional performance share units equal in value to the dividend paid on the number of common shares proportional to the number of performance share units held by the employee, based on the sixty-one trading days volume weighted average share price on the date of the dividend.

In transitioning to the new plan, a special transition series of performance share units were issued to eligible employees at the Company's mine sites on January 2, 2014, with 50% vesting at the end of 2014 and 50% at the end of 2015.

10. Commitments and Contingencies

Commitments

As at June 30, 2014, the Company had entered into contracts to purchase capital equipment and operational supplies totalling $57.1 million (Kumtor - $56.8 million and Boroo - $0.3 million) which are expected to be settled over the next twelve months.

Contingencies

Various legal and tax matters are outstanding from time to time due to the nature of the Company's operations. While the final outcome with respect to actions outstanding or pending at June 30, 2014 cannot be predicted with certainty, it is management's opinion that, except as noted below, their resolution will not have a material adverse effect on the Company's financial statements.

Kyrgyz Republic

(i) Negotiations between Kyrgyz Republic and Centerra

Following discussions with representatives of the Kyrgyz Government in the second half of 2013, Centerra announced on December 23, 2013 that it had entered into a non-binding heads of agreement ("HOA") with the Government of the Kyrgyz Republic in connection with a potential restructuring transaction under which Kyrgyzaltyn would exchange its 32.7% equity interest in Centerra for an interest of equivalent value in an entity that would own the Kumtor Project. On February 6, 2014, after their review of the HOA, the Kyrgyz Parliament adopted a resolution relating to the restructuring described in the HOA but which contains a number of recommendations that are inconsistent with the terms of the HOA. Among other things, the resolution calls for further audits of the Kumtor operation and for the Government and the General Prosecutor's Office to continue pursuing claims for environmental and economic damages, which the Company disputes.

Centerra expects to continue its discussions with the Government regarding a potential restructuring transaction relating to the Kumtor Project. However, the Company maintains that any agreement must be fair to all of Centerra's shareholders. Any definitive agreement for a potential restructuring remains subject to required approvals in the Kyrgyz Republic, including the Government and Parliament of the Kyrgyz Republic, Centerra Special Committee and Board approval, as well as compliance with all applicable legal and regulatory requirements and approvals, including an independent formal valuation and shareholder approval.

(ii) Environmental Claims

On June 7, 2013, Kumtor received four claims filed by the Kyrgyz Republic State Inspectorate for Environmental and Technical Safety ("SIETS") with the Bishkek Inter-District Court. The SIETS environmental claims seek to enforce the previously disclosed environmental claims issued by SIETS in December 2012, seeking compensation in the aggregate amount of approximately $150 million in relation to (i) placement of waste rock on glaciers; (ii) unpaid use of water from Petrov Lake; (iii) unaccounted industrial and household waste; and (iv) damages caused to land resources (top soil). Each of these claims was dismissed by the Bishkek Inter-District Court and, on appeal, by the Bishkek City Court, on the basis that the arbitration clause in the Restated Investment Agreement requires that all such disputes be resolved through international arbitration.

SIETS appealed each of these decisions to the Kyrgyz Supreme Court, which upheld the appeal and referred the cases back to the Bishkek Inter-District Court. Notably, the Kyrgyz Supreme Court did not decide the question of jurisdiction but referred the cases back to the court of first instance.

In addition to the original four claims of SIETS discussed above, SIETS has filed the following additional claims against KOC: (i) on October 12, 2013, a claim in the amount of approximately $485,000 for damages caused to land resources due to disturbance of land at the Kumtor Project (similar to the claim in (iv) above but involving a different area of the Kumtor concession); and (ii) on January 21, 2014, a claim for approximately $8.5 million for lost agricultural production and lost profits from 1994 to 2042. Kumtor has responded in writing to SIETS disputing both of these additional claims.

On February 21, 2013, a claim was commenced by Kyrgyz Republic State Agency for Environmental Protection and Forestry ("SAEPF") for the aggregate amount of approximately $315 million is currently being appealed by KGC on a preliminary motion in the Bishkek City Court.

Kumtor believes the claims are exaggerated and without merit. The Kumtor Project has been the subject of systematic audits and investigations over the years by Kyrgyz and international experts, including by an independent internationally recognized expert who carried out a due diligence review of Kumtor's performance on environmental matters at the request of Centerra's Safety, Health and Environmental Committee of the Board of Directors.

(iii) Land Use Claim

On November 11, 2013, the Company received a claim from the Kyrgyz Republic General Prosecutor's Office requesting the Inter-District Court of the Issyk-Kul Province to invalidate the Company's land use certificate and seize certain lands within Kumtor's concession area.

The Company believes that the invalidation of the land use certificate and purported seizure of land is in violation of the Kyrgyz Republic Land Code as well as the Restated Investment Agreement, which provides that the Kumtor Project is guaranteed all necessary access to the Kumtor concession area, including all surface lands as are necessary or desirable for the operation of the Kumtor Project.

There are several important outstanding issues affecting the Kumtor Project, which require consultation and co-operation between the Company and Kyrgyz regulatory authorities. The Company has benefited from a close and constructive dialogue with Kyrgyz authorities during project operations and remains committed to working with them to resolve these issues in accordance with the agreements governing the Kumtor Project (the "Kumtor Project Agreements"), which provide for all disputes to be resolved by international arbitration, if necessary. However, there are no assurances that the Company will be able to successfully resolve any or all of the outstanding matters affecting the Kumtor Project. There are also no assurances that continued discussions between the Kyrgyz Government and Centerra will result in a mutually acceptable solution regarding the Kumtor Project, that any agreed upon proposal for restructuring would receive the necessary legal and regulatory approvals under Kyrgyz law and/or Canadian law and that the Kyrgyz Republic Government and/or Parliament will not take actions that are inconsistent with the Government's obligations under the Kumtor Project

Agreements, including adopting a law "denouncing" or purporting to cancel or invalidate the Kumtor Project Agreements or laws enacted in relation thereto. The inability to successfully resolve all such matters would have a material adverse impact on the Company's future cash flows, earnings, results of operations and financial condition.

Mongolia

Gatsuurt

Centerra continues to be in discussions with the Mongolian Government regarding the development of the Gatsuurt property. Centerra remains reasonably confident that the economic and development benefits resulting from its exploration and development activities will ultimately result in the Mongolian Water and Forest Law having a limited impact on the Gatsuurt Project, in particular, and other of the Company's Mongolian activities, including the ATO deposit. The Mongolian Water and Forest Law prohibits mineral prospecting, exploration and mining in water basins and forestry areas in Mongolia.

During meetings with representatives of the Mongolian Government, Centerra was advised that the Mongolian Government has developed a list of deposits, which includes Gatsuurt, which was submitted to the Mongolian Parliament for consideration as "strategic deposits". Parliament and/or any relevant committees of Parliament will consider this matter further in the second half of 2014. If the Mongolian Parliament ultimately approves this designation, it would have the effect of excluding the Gatsuurt deposit from the application of the Mongolian Water and Forest Law and would allow the Government of Mongolia to acquire up to a 34% interest in Gatsuurt. The terms of any such participation would be subject to negotiations with the Mongolian Government.

There can be no assurance, however, that the Water and Forest Law will not have a material impact on Centerra's Mongolian operations. Unless the Water and Forest Law is repealed or amended such that the law no longer applies to the Gatsuurt Project or Gatsuurt is designated by the Parliament of Mongolia as a "mineral deposit of strategic importance" that is exempt from the Water and Forest Law, mineral reserves at Gatsuurt may have to be reclassified as mineral resources or eliminated entirely and the Company may be required to write-off approximately \$38.1 million related to the investment in Gatsuurt and approximately \$38.7 million of costs that remain capitalized for the Boroo mill facility and other surface structures. These amounts represent the capitalized costs at June 30, 2014 associated with its investment in Gatsuurt and Boroo (where Gatsuurt ore is planned to be milled).

11. Related Party Transactions

Kyrgyzaltyn JSC

Revenues from the Kumtor gold mine are subject to a management fee of $1.00 per ounce based on sales volumes, payable to Kyrgyzaltyn JSC ("Kyrgyzaltyn"), a shareholder of the Company and a state-owned entity of the Kyrgyz Republic.

The table below summarizes the management fees paid and accrued by Kumtor Gold Company ("KGC"), a subsidiary of the Company, to Kyrgyzaltyn and the amounts paid and accrued by Kyrgyzaltyn to KGC according to the terms of a Restated Gold and Silver Sale Agreement between KGC, Kyrgyzaltyn and the Government of the Kyrgyz Republic dated June 6, 2009.

The breakdown of the sales transactions and expenses with Kyrgyzaltyn are as follows:

Gold produced by the Kumtor mine is purchased at the mine site by Kyrgyzaltyn for processing at its refinery in the Kyrgyz Republic pursuant to a Gold and Silver Sale Agreement. Amounts receivable from Kyrgyzaltyn arise from the sale of gold to Kyrgyzaltyn. Kyrgyzaltyn is required to pay for gold delivered within 12 days from the date of shipment. Default interest is accrued on any unpaid balance after the permitted payment period of 12 days.

The obligations of Kyrgyzaltyn are partially secured by a pledge of 2,850,000 shares of Centerra owned by Kyrgyzaltyn.

As at June 30, 2014, $15.7 million was outstanding under the Sales Agreement (December 31, 2013 - $69.4 million). Subsequent to June 30, 2014, the balance receivable from Kyrgyzaltyn was paid in full.

12. Fair value measurements

All financial instruments measured at fair value are categorized into one of three hierarchy levels for which the financial instruments must be grouped based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's assumptions. These two types of inputs create the following fair value hierarchy:

Level 1: observable inputs such as quoted prices in active markets;

Level 2: inputs, other than the quoted market prices in active markets, which are observable, either directly and/or indirectly; and

Level 3: unobservable inputs for the asset or liability in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The following table summarizes the fair value measurement by level at June 30, 2014 and December 31, 2013 for assets and liabilities measured at fair value on a recurring basis:
