

Which CEREC® course is right for me?

cerecdoctors.com offers one of the world's most comprehensive CEREC® curriculum. With nine levels of hands-on education at two state-of-the-art learning campuses, we offer more for CEREC users of all proficiencies.

Our goal is to create empowered CEREC users who enjoy the technology and use it passionately for clinical and financial success.

The cerecdoctors.com curriculum begins after you have completed Initial Training, and guides you to advanced CEREC aptitude. While our courses do not need to be taken sequentially, we do recommend beginning with our Level 2 course. Many seasoned doctors benefit from Level 2 because of the solid foundation it provides for both new and experienced users.

The cerecdoctors.com curriculum differs from other CEREC training centers because of our unique approach to learning. Each course is very thorough and comprehensive. Even if you have attended CEREC training at other venues, what you learn from cerecdoctors.com will definitely take you beyond the knowledge and skills you currently have.

So that you get the most from your CEREC journey, and to ensure that you are in the most appropriate course, we recommend that you review the following criteria to gauge where you should begin your CEREC journey.

REMEMBER – COURSES FILL UP QUICKLY

Level 1:
Initial Training

Level 2:
CEREC Mastery - Rapid Integration into Your Practice

Level A2:
CEREC Mastery For Dental Assistants

Level 3:
Provisioning and Restoring Implants with CEREC

Level 4A:
Mastering Multiple Anterior and Posterior Restorations with CEREC

Level 4B:
Treating Comprehensive Cases with a Digital Workflow

Level 5:
Advanced CEREC Software Mastery - Foundation For Integration Into your Practice

Level 6A:
CEREC and Cone Beam Integration in Surgical Implant Dentistry

Level 6B:
Digital Esthetic Dental Implant Therapy and Advanced Grafting

Level 6C:
Digital Full Arch Dental Implant Therapy

Level 2

CEREC MASTERY – RAPID INTEGRATION INTO YOUR PRACTICE

CE CREDITS 13

FORMAT 2 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$2,995 Staff: \$995*

**Staff member must accompany doctor to receive staff member rate*

Level 2 is NOT a replacement for Initial Training, which is a prerequisite for this course. Whereas Initial Training through your branch concentrates on one design technique (Biogeneric Individual) on single teeth, Level 2 teaches ALL available design techniques on multiple units. Additionally, time is spent on designing and finishing chairside bridges, provisional and permanent. It is recommended to take Level 2 after you have completed a minimum of 35 restorations.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Level 2 is recommended for doctors who:

Cannot consistently finish a restoration in 90 minutes or less

Are not familiar with all the software tools and menus

Do not understand the differences in the design modes

Do not thoroughly understand what Parameters are

Do not know how to efficiently design and finish an anterior ceramic bridge

Do not realize the concept of proper preparation design with the CEREC

Do not understand the concept of over-milling and the different milling modes

Are not using the CEREC machine to the fullest capacity

Wish to completely master the fundamentals of CEREC dentistry

Level A2

CEREC MASTERY – FOR DENTAL ASSISTANTS

CE CREDITS 13

FORMAT 2 Days | Lecture & Hands-on Workshop

TUITION Staff: \$1,995

The most efficient offices use CEREC with a team approach. There is no better way take care of patients in a single visit when the entire team is on board, all working together in harmony.

The new dedicated assistants training class is designed to teach assistants on all aspects of CEREC from software, design, materials and milling. This two-day hands on intensive workshop is designed to allow assistants to take over the entire CEREC restoration fabrication process.

Each participant will have a dedicated CEREC machine at their disposal to allow for ample hands on time with design and finishing of the CEREC restorations.

Participants will learn:

How to recognize ideal preparation designs for inlays, onlays, veneers and crowns

The different design techniques of Biogeneric Individual, Biogeneric Copy and Copy and Mirror (Biogeneric Reference), how they work and when to use them

A review of the available materials and their appropriate clinical uses

Hands on exercises with dedicated CEREC machines for each paid assistant seat

Hands on with stain and glaze on multitude of materials

Ideal polishing techniques for esthetic restorations

Step by step zirconia restoration fabrication process

Cementation technique discussion

Fabrication of inlays, onlays, crowns, bridges

Review of implant components and the CEREC implant workflow

Level 3

PROVISIONALIZING AND RESTORING IMPLANTS WITH CEREC

CE CREDITS 13

FORMAT 2 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$2,995 Staff: \$995*

**Staff member must accompany doctor to receive staff member rate*

CEREC will produce highly esthetic implant restorations with perfect occlusion and contacts, whether you are treating a single tooth or complete quadrant. Fabricating chairside implant restorations opens an avenue to be more productive in the office whether you are temporizing an edentulous area for implants or fabricating the final restoration.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Level 3 is recommended for doctors who:

Wish to learn the differences between the various blocks for fabricating provisional and permanent chairside abutments

Would like to fabricate chairside abutments for implants utilizing CEREC software

Want to use CEREC to create temporary and permanent implant restorations

Want to utilize CEREC to create and restore both screw-retained and cement-retained implant restorations

Want to understand how different tools affect implant proposals and where and when to use them

Would like to explore the CEREC/Galileos connection and the integration between cone beam and CAD/CAM

Would like to create provisional and permanent Maryland bridges

Want to understand File and image management as it relates to implant restorations fabricated with CEREC

Would like to create Maryland bridge temporary restorations for patients waiting for implant integration

Want to fabricate custom healing abutments with CEREC

Level 4A

MASTERING MULTIPLE ANTERIOR AND POSTERIOR RESTORATIONS WITH CEREC

CE CREDITS 13

FORMAT 2 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$2,995 Staff: \$995*

**Staff member must accompany doctor to receive staff member rate*

Once you have mastered the basic and advanced techniques taught in Level 2, and want to test and expand your knowledge, consider the Level 4 course. Level 4 is intended for doctors who have completed Level 2 and want to apply the knowledge to go deeper with the CEREC and utilize the technology for larger cases.

Note – Completion of Level 2 is strongly recommended prior to attending Level 4

Note – Staff seating is exclusive to Scottsdale, AZ location.

Intended for doctors who:

Wish to learn how to prepare anterior teeth for optimal esthetics and master the art of contouring milled anterior restorations

Are ready to master treating anterior cases same day and indirect in two visits

Want to learn how to create CEREC quadrant restorations, both anterior and posterior, in the most efficient manner

Want to understand the principles of Smile Design and how to apply them in your planning and case presentations and in your case executions

Level 4B

TREATING COMPREHENSIVE CASES WITH A DIGITAL WORKFLOW

CE CREDITS 20

FORMAT 3 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$5,495 Staff: \$1,995*

**Staff member must accompany doctor to receive staff member rate*

CEREC goes beyond just single-tooth dentistry. This workshop will explore techniques for comprehensive cases and teach users to perform virtual wax ups, utilize the virtual articulator and incorporate cone beam scans to evaluate the patient's dentition and occlusion.

All cerectoctors.com hands-on workshops are conducted on Omnicams utilizing the latest CEREC software. Before attending the workshop, review the latest videos on abutments. There will be other videos that are recommended after the workshop.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Participants will learn:

How to perform the new patient exam in the digital age

The difference between the CEREC Software design techniques as it relates to comprehensive dentistry

The appropriate way to stage cases to help with financial need patients

The proper way to program and utilize the virtual articulator in the CEREC software

How to use the SICAT Function software suite

Efficient placement and use of the SICAT JMT device

Virtual wax ups and mock ups

Cementation techniques for large comprehensive cases

Material selection for comprehensive cases

Utilizing photography for patient education and communication

Understand how 3D printing plays a role in the digital workflow

Explore the currently available printers as well as their current indications

Level 5

ADVANCED CEREC SOFTWARE MASTERY - FOUNDATION FOR INTEGRATION INTO YOUR PRACTICE

CE CREDITS 20

FORMAT 3 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$5,495 Staff: \$1,995*

**Staff member must accompany doctor to receive staff member rate*

CEREC inLab is the more advanced version of the CEREC chairside software that labs use. More and more clinicians have integrated the software as it allows them to do more with their CEREC systems.

This workshop lays down the foundation for inLab success so that clinicians can use the software in a multitude of different scenarios for larger cases. Designed for the treatment of comprehensive cases, users will learn the various tools that are unique to the software as well as the different file designs and how to import and export files from inLab to use with a multiple fabrication options.

The workshop is hands on intensive and will allow doctors to design, export, mill a multitude of various types of restorations.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Participants will learn:

How the inLab software differs from the CEREC Chairside software

Different file formats that work with the inLab software

Digital smile design and mock ups

Advanced case design with CEREC inLab software including implant applications

Level 6A

CEREC AND CONE BEAM INTEGRATION IN SURGICAL IMPLANT DENTISTRY

CE CREDITS 13

FORMAT 2 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$2,995 Staff: \$995*

**Staff member must accompany doctor to receive staff member rate*

This course will give you the experience to utilize the Sirona Cone Beam CT (Galileos or XG3D) for surgical planning of implants and may help you to understand the fundamentals of guided implant surgery. Intended for clinicians who are interested in, new to, or moderately experienced with implant therapy. This two-day lecture will take you from A to Z in all aspects of guided-implant planning using the Galileos/XG3D and the CEREC, as well as provide a complete understanding of all the different guided systems that are available to work with the CEREC and Galileos integration protocol. Learn the basics of implant placement using the guided protocol, and the advantages and disadvantages of each surgical system.

In the demonstration portion on Day 2, students will watch a surgical case that imports the CEREC models into the Galileos software, and virtually places the implants in the ideal position. Participants will then view a fabrication of a surgical guide for implant placement and learn how to utilize this guide according to the guided surgery protocol. This will provide a thorough understanding of the integrated digital implant dentistry protocol, where accurate treatment planning provides a blueprint for the surgical phase, thereby rendering the final restorative phase predictable and ideal.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Participants will learn:

The fundamentals of CEREC and Galileos integration

The basics of dental implant treatment planning, including the advantages of prosthetically driven treatment planning

The basics of guided surgery over current freehand techniques

The fundamentals, differences, indications, and step-by-step directions for the various surgical guide options available within the CEREC-Galileos integration workflow

To import prosthetic proposals designed in CEREC into Galileos Implant Software to be used for implant planning

To digitally treatment plan simple to complex dental implant cases

To plan, design, and fabricate a chairside surgical guide with the CEREC Guide 2 solution

Guided surgery tips and tricks to ensure a predictable implementation

The steps involved from start to finish in planning, placing and restoring an implant using the guided protocol and CEREC

Level 6B

DIGITAL ESTHETIC DENTAL IMPLANT THERAPY AND ADVANCED GRAFTING

CE CREDITS 20

FORMAT 3 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$5,495 Staff: \$1,995*

**Staff member must accompany doctor to receive staff member rate*

You attended Level 6A and learned all there is to learn on how to treatment plan implants and create surgical guides. Level 6B will allow you to take your education further and learn more advanced techniques such as grafting and soft tissue development.

This 3-day workshop is designed for advanced users and those that want to learn more ways to more ideally treat their implant patients. The workshop will show you the latest techniques, materials and procedures to provide the most ideal implant therapy.

Note – Staff seating is exclusive to Scottsdale, AZ location.

Participants will learn:

Digital treatment planning for esthetic cases

Post-extraction implant therapy in the esthetic zone using custom healers

Soft tissue and bone grafting in esthetic implant therapy using different types of graft materials and techniques

Developing the transition zone in esthetic implant therapy

Digital restoration of esthetic implant cases

Materials available for single unit implant therapy

Advanced bone grafting

Sinus grafting

Level 6C

DIGITAL FULL ARCH DENTAL IMPLANT THERAPY

CE CREDITS 20

FORMAT 3 Days | Lecture & Hands-on Workshop

TUITION Doctor: \$5,495 Staff: \$1,995*

This 3-day workshop will take participants through the full digital workflow on how to treat a fully edentulous patient. Utilizing CEREC and cone beam, users will learn the tips and tricks for a systematic workflow for treatment planning, designing and executing full arch implant therapy for patients.

Designed for users that have completed levels 6A and 6B, this intensive workshop will give you the tools you need to treat a fully edentulous patient with a completely digital workflow. All aspects of the CEREC chairside and inLab workflow relevant to the process will be discussed in this workshop.

Participants will learn:

Intro to digital full-arch implant prosthetics

Edentulous options – Indications and Contraindications

Pros and cons of various options, space requirements, maintenance

Materials review for fixed hybrids

Review of analog concepts

Treatment planning for full arch implant prosthetics

Records collection

Classic Guide vs Digital Guide workflow

Soft-tissue supported vs tooth supported guides

Galileos/CBCT/CEREC/InLab integration concepts and the available file types - Ortho models, .dxd, .cmgdx, .ssi, .iLab, .stl

Ortho imaging for diagnostic models

CBCT anatomy review and Galileos features

Positioning multi-unit abutments for angled implants

Guide sleeve considerations

Surgical considerations (lecture)

Implant selection

Multi-unit abutment and gingival collar selection

Serial extractions and staging multiple guides

Prosthetic design and hygiene/maintenance

InLab review and overview of InLab software

When do we need SICAT and when must an analog workflow be used?

Hardware and software limitations of the Dentsply Sirona workflow

Need additional guidance?

If you are unsure which course is right for you, contact us at **877.295.4276** or email at courses@cerectoctors.com. Our goal is to ensure that your learning experience is maximized by completing the curriculum in the appropriate manner.
