

Smart Tips for Smartphones

DO turn off your cellphone at the beginning of class—and no later!

Off means fully off—not just on vibrate or silent.

DO check your phone only in between classes or at lunch.

That's the time to catch up on your text messages and check social media!

Dos and
Don'ts for
Every
Classroom

DON'T move your phone from your pocket or the designated spot until the teacher says so.

The exception is if you need to use a certain tool, such as the phone's calculator.

DON'T forget the consequences of improper cellphone use.

While these devices serve their purpose, they are also distracting. 😊
