

Name _____

Task 2

MP Model with Mathematics Morgan's class needs to arrange 12 chairs into 2 or more equal rows for a concert. What are all the ways the chairs can be arranged?

Show each array. Label the number of rows and number of tiles in each row.

- A.** What multiplication equations can you write to model the arrays?

**Turn
& Talk**

What patterns do you see in the arrays?

Review  **Spark Your Learning**

What might you do differently if you solved the problem now?
