

Introducing Nitro Pro 12

PDF productivity at enterprise scale

From enhancing collaboration and expediting your daily workflows to reducing printing and protecting your data, Nitro Pro 12 optimizes the way your teams work with documents and each other.

Work faster and more intuitively

Convert documents with greater accuracy

When converting PDF to Word, Excel, PowerPoint, and other formats, you'll now enjoy greater conversion accuracy, smaller file sizes, and increased consistency in content, images, layout, colors, and fonts.

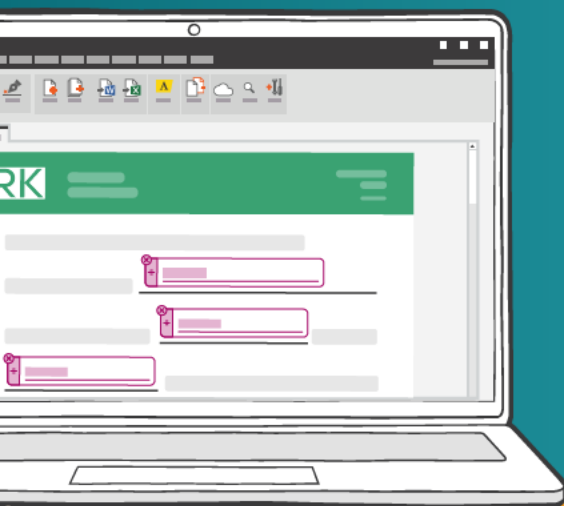

Access and share files quicker

The new OneDrive for Business connector enables you to save your PDFs directly to OneDrive, making it easy to create and share access links with colleagues.

Save time finding your favorite tools

The improved user interface provides more convenient access to popular tools and actions—such as locating specific content with the "Find" function, or adding, deleting, rotating, and moving pages with the "Organize Pages" feature.

Accelerate your most common workflows

Easily transition from document creation to signing workflows

The new Nitro Cloud integration enhances collaboration by equipping every Nitro Pro user with eSigning tools and the ability to seamlessly move from document creation to sharing and signing workflows.

Skip the printer

Replace printing with more efficient, cost-effective digital workflows by leveraging Print Alternatives, which suggest Nitro features to use instead of printing when you open the print dialog box.

Meet any signing need—big or small

Get your documents signed faster

The new single-signer workflow makes it simple to prepare a PDF in Nitro Pro, then send your document out for quicker signature collection via Nitro Cloud. Once in Nitro Cloud, you can track the progress of your signature request through activity notifications and insights.

Fulfill your most stringent digital signature requirements

Use Nitro Pro to add your own digital signature, which encrypts and locks your document for the highest level of document security. The new Chain of Trust tool helps you automate trusted contacts for quicker validation of digital signatures you receive.

Add your own signature

Perfect for everything from contracts and POs to expense reports and NDAs, the QuickSign tool allows you to apply your own eSignature in seconds, directly within your PDF.
