Notes: Significant mineralized intervals are greater than 1.00 g/t Au
 Individual assays are top cut to 60 g/t Au prior to composite calculation
 Lower cut-off for higher grade sub-intervals is 7.0 g/t Au
 True widths for mineralized zones are about 40% to 95% of stated down hole interval
 This information should be read together with our news release of April 30st, 2009. Ian Atkinson, a Certified Professional Geologist, is Centerra's qualified person for the purpose of National Instrument 43-101
 Tables are current as of April 01, 2009.
