

## MOUNTMILLIGAN

<b>Policy: Environmental Policy</b>		
<b>Effective Date:</b> June 1, 2018	<b>Supersedes</b> April 22, 2013	<b>Guideline No.</b> TC-02
<b>Approved</b> _____, General Manager		

Mount Milligan is a conventional truck-shovel open-pit copper-gold mine and concentrator, located in central British Columbia. Mount Milligan is committed to protection of the environment for present and future generations and the health and safety of our employees and those associated with our operations.

Mount Milligan employees are responsible for incorporating the actions necessary to fulfill this commitment into their business and operational planning and work. To meet these responsibilities, Mount Milligan will provide each of its employees and operating sites with the necessary resources to:

- Maintain our commitment to prevent adverse environmental impacts and prevent pollution by designing, constructing, operating and reclaiming our facilities to comply with or exceed applicable laws, regulations, obligations and industry practices, and by avoiding, reducing or controlling emission or discharge of pollutants.
- Implement the Environmental Management System to promote optimization of mineral processing and waste management, economic achievement, a proactive culture among our employees, community engagement and efficient energy management.
- Communicate openly with the public and government regarding our plans, programs and performance. Work cooperatively with government agencies, local communities, suppliers and trade associations to ensure the safe use and disposal of all our materials and products.
- Acquire knowledge and technologies to improve the safe and efficient implementation of our processes, materials and emergency response systems. In all instances, apply best practical management practices to advance environmental protection, minimize environmental risk and ensure the health and safety of our employees.
- Achieve continuous improvement through the development of environmental performance evaluation procedures and associated indicators, including continuous self-monitoring, audit programs and management reviews to ensure compliance with governmental and Company requirements and with this policy.
- Ensure this policy is publically available on our company and project-specific websites.
