

CrisisGo Simulation Trainings

Providing a dynamic and interactive way to practice safety responses, learn about potential gaps in your protocols, gain safety technology skills, and learn more about CrisisGo's safety tools and features.

Why It's the Best Method for Training

Interactive solutions are an opportunity for the safety team to practice live responses to questions their staff could ask during an emergency.

Not only does CrisisGo have standard and advanced simulation series for interactive training, but you can also create your own simulation safety cards to tweak our existing simulations or create simulations of your own.

Our simulations highlight gaps in safety knowledge for staff and safety team members, as well as weak areas in your current safety plan. They also test your organization's ability to respond quickly and effectively to specific safety issues.

Our Simulation Scenarios Include:

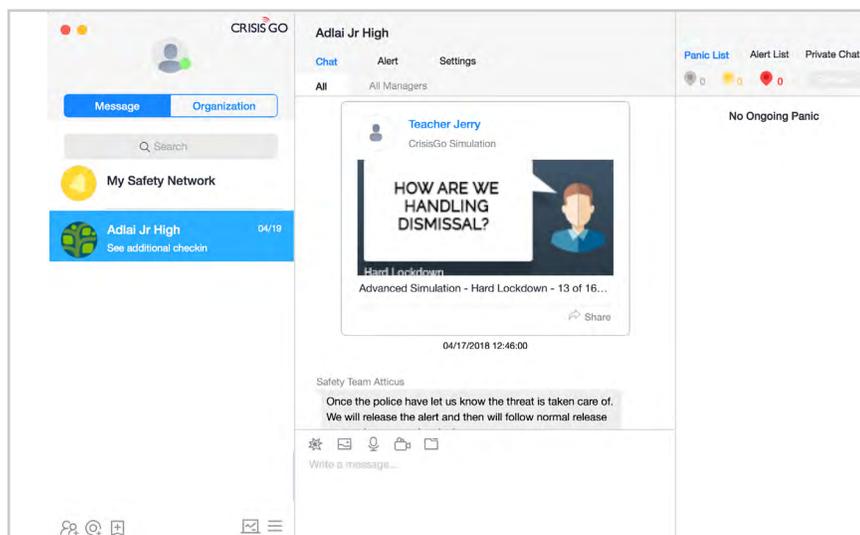

- Hard Lockdown
- Fire
- Missing Student
- Medical Emergency
- Bomb Threat

How It Works

Simulation Safety Cards are scheduled to be sent to your message group every minute. Using CrisisGo's pre-defined scenario and timeline, the Safety Team will send messages within the group to respond to the questions appearing on the simulation safety Cards. The use of safety features on the CrisisGo app, like our Check In tool, can be initiated in between simulation cards. The responses should adequately articulate your building's corresponding crisis SOP.

Benefits

- The fast-paced nature requires quick responses to important safety questions.
- Strengthen your staff's familiarity with the CrisisGo app by incorporating our safety tools into simulation exercises.
- Simulations can be customized based on the safety needs of your organization.
