Lipid Panel

Continued to Page 2

11/2005

Cholesterol

When there is too much cholesterol - a fat like substance - in your blood, it builds up in the walls of your arteries and increases your risk of developing heart disease

Your Result
240 MG/DLTarget
<200 MG/DL**LEVEL: HIGH**

Here are some tips on how to maintain a good level

- 1 Eat more food with Dietary Fiber, such as peas, rye, soybeans, and almonds
- 2 Exercise more - Increases HDL (good cholesterol)
- 3 Lovaza - Omega-3 fatty acids—the healthy fats found in fish and fish oil—in a concentrated dose. It can help lower triglycerides in people with very high levels.

HDL (High-Density Lipoprotein)

HDL is known as good cholesterol because it aids in the removal of cholesterol that can block arteries and reduce blood flow.

Your Result
43 MG/DLTarget
<40 MG/DL**LEVEL: AVERAGE**

Here are some tips on how to maintain a good level

- 1 FPO - Is ut faccae nobite sit officto tem vitiore equam aut occaerio moluptatem autam quam
- 2 FPO - Is ut faccae nobite sit officto tem vitiore equam aut occaerio moluptatem autam quam

Lipid Panel

Continued from Page 1

11/2005 (MOST RECENT)

Non HDL-C (Non-High-Density Lipoprotein Cholesterol)

HDL is known as good cholesterol because it aids in the removal of cholesterol that can block arteries and reduce blood flow.

Your Result
76 MG/DL

Target
<130 MG/DL

i LEVEL: GOOD

Here are some tips on how to maintain a good level

- 1 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam
- 2 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam

Triglycerides

Triglycerides are chains of high-energy fatty acids, provide much of the energy needed for your tissues to function.

Your Result
202 MG/DL

Target
<150 MG/DL

i LEVEL: GOOD

Here are some tips on how to maintain a good level

- 1 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam
- 2 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam

LDL (Low-Density Lipoprotein)

LDL collects in the walls of blood vessels, causing the blockages of atherosclerosis. Higher LDL levels put you at greater risk for a heart attack.

Your Result
241 MG/DL

Target
<100 MG/DL

i LEVEL: VERY HIGH

Here are some tips on how to maintain a good level

- 1 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam
- 2 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam
- 3 FPO - Is ut faccae nobite sit officto tem vitioire equam aut occaerio moluptatem autam quam
