REVISED 10-21-65

ENGINEERING MEMO #129

TO: Memo Distribution  
FROM: R. G. Fuller  
SUBJECT: CASTER ANGLE SETTING-PRODUCTION & SERVICE

Because the wight on the front wheels of a vehicle is most important with reference to the steering effort when car is not equipped with power steering, the following deviations in caster angle settings are offered:

CASTER ANGLE

+1°

LOADING CONDITIONS

V-8 Engines without Power Steering
