

ENGINEERING MEMO #156

TO: Memo Distribution
FROM: R. E. Orwig
SUBJECT: LATEX FOAM RUBBER SEAT CUSHION PADS

At the request of Management and to improve our product, all of the present Molded Polyether Foam Cushion Pads are being cancelled and replaced by Molded Latex Foam Rubber. The new pads are interchangeable with the old and the change will be made without obsolescence of any material. The actual effective point of the change for the various pads will depend on the availability of the new pads and the using up of all stock of old pads.

It should be noted that due to the method of molding for Latex Foam Rubber Pads, the burlap insulators cannot be integral with the pad (as with the present Polyether Pads). Therefore, separate insulators-burlap & wire- are being released for use with the new pads and must be hog ringed to the spring assembly before hog ringing the pad to the spring.

Following is a list of old and new parts affected:

	634171	Pad-Front Seat Cushion	}	OLD PARTS
	640169	Pad-Rear Seat Cushion-Taxi		
	642669	Pad-Rear Seat Cushion-Pass.		
	636269	Pad-Rear Seat Cushion-Station Wagon		
	640151	Pad-Rear Seat Cushion-Forward		
NEW PARTS	644045	Pad-Front Seat Cushion - Ch.#45793 (Exc.Aero.), 2229 A-12W6&8
