ENGINEERING MEMO #167

TO: Memo Distribution  
FROM: B. Lewis  
SUBJECT: RADIATOR FOR AIR COND. CARS

In order to provide maximum cooling for 6 cyl. cars W/Air Cond. and to standardize on one radiator for all Air Cond. jobs, all B/M covering 6 cyl. Air Conditioning will be changed to call for Radiator Assem. 701717 (2" core-15 Fin.) instead of 701716 (1 1/4" core-12 Fin.). This change, which will become effective on all cars built Jan. 3, 1967 and thereafter, will also eliminate the necessity for the Sales Dept. to call out any H. D. Radiator option on Production Orders for Air Cond. cars.
