ENGINEERING MEMO #239

TO: Memo Distribution
FROM: B. Lewis
SUBJECT: ENGINE THERMOSTAT FOR ISRAEL DIESEL CARS ONLY

Effective at once, Israel Diesel Engines must be equipped only with Bellows Type AC thermostat made in England. This is Perkins Part #2485696 and is rated at 79°C (176°F).

Until Perkins can make the change in production, each engine to be shipped to Israel must have the thermostat housing removed and the Wax Pellet Type thermostat replaced with the above noted Bellows Type thermostat. A new gasket and an adapter will be required to complete this change over.

List of New Parts Required (to be supplied by Perkins as soon as available)

	<u>Perkins #</u>	<u>Checker #</u>	<u>Name</u>	<u>Qty. Req'd. Per Engine</u>
