ENGINEERING MEMO #275

TO: Memo Distribution
FROM: B. Lewis
SUBJECT: BUCKET SEAT SKIRT REVISION

At the request of Management and to standardize production of Bucket Seats, a new Skirt will be released for use on the RH side of the driver's Bucket Seat and on the LH side of the Passenger Bucket Seat.

This new design skirt will permit full forward travel of the Bucket Seat without interference with the floor pan transmission hump and thereby improve wheelchair loading on Ambulance Conversion models.

Service and interchangeability of Bucket Seats will not be affected except that the new complete assemblies must be designated LH or RH as required.

This revision will become effective without obsolescence as soon as possible.
