ENGINEERING MEMO #390

TO: Memo Distribution  
 FROM: C. Bland  
 SUBJECT: REVISED LOCK SETS FOR 1978 MODEL YEAR

The lock set vendor has requested that Checker Motors assign new part numbers to Lock Sets, Lock Cylinder Assemblies and Keys for 1978 production to reflect a General Motors change in the Key section for both Primary and Secondary Locks.

The new Lock Sets can supersede the old sets without obsolescence in production, but the changeover should be scheduled to coincide with the start of the 1978 model year production.

Service will be affected in that old and new keys and lock cylinder will not interchange because of revised key grooves. Key code number series will also change on the new locks and coding sheets will be furnished to service at a later date.

Following is a complete list of the parts affected:
