ENGINEERING MEMO #425

TO: Memo Distribution

FROM: R. E. Orwig

SUBJECT: 305 V8 Engine Discontinue
(Effective 1981 Model Year)

At the request of Management, the 305 V8 Engine will be discontinued as an optional power plant in Checker Motors vehicles - - effective with the 1981 Model Year.

This comes as a result of our 229 V6 and 267 V8 Engines both passing the California Emission Requirements for 1981. Also, by this engine deproliferation, CMC's Corporate Average Fuel Economy (C.A.F.E.) will be improved.

Following is a complete list of the parts affected by the discontinued use of this engine:
