Education	Master of Computer Science – Wayne State University	Dec 2014
	B.S. Computer Science – Wayne State University	July 2013
	B.A. Mathematics – Wayne State University	July 2013
Experience	Software Developer – Integral	2020 – Present
	A consulting company that leverages building teams to use TDD and paired programming in order to satisfy clients' needs. My primary focus at Integral is working as a consultant / engineer for Ford designing and implementing software for autonomous vehicle management. The main project is a React frontend that is used to consume and manage a variety of vehicle data.	
	Lead Developer – Hunch Free	2017 – 2020
	A web / digital marketing agency. During my time at Hunch Free I handled any SaaS projects that needed to be built. This included designing the database foundation for all projects, scraping data as needed from online sources, and scaffolding the entire project until completion. Used PHP / Laravel for most implementations along with AWS / CPanel.	
	Full Stack Web Developer – ViewTurn	2014 – 2017
A startup company I helped design and create. ViewTurn is a web application created to simplify the job application process. A PHP / Laravel project used to create resume parsing algorithms, video/audio compression/conversion, and complex access control.		
Full Stack Web Developer – TrackLeft	2013 – 2014	
Another startup created from the ground up. TrackLeft is a sales process tool intended to create a better salesman. Using PHP / Laravel we quickly created this project in a couple months. Managed MySQL, AWS servers, and development.		
Mathematics Tutor – Wayne State University	2006 – 2012	
Responsible for tutoring college level math: Pre-calculus, Calculus 1-3, Linear Algebra, Abstract Algebra, Statistics. Proctored for numerous college level exams.		

Freelance Web Development – Self Employed

2006 - Present

Developed websites using HTML, PHP, MySQL, and Photoshop. Additionally used content manage systems such as: WordPress, Joomla, Drupal, e107, and cPanel. All depending on client needs.

Technical

Language Proficiency: PHP, Laravel, React, JavaScript, CSS, NodeJS

AWS: EC2, CodeDeploy, S3, ElasticBeanStalk, Route53, RDS

Knowledgeable of: PHPStorm, WebStorm, GitHub, Vagrant, Material UI

Comfortable developing on: Windows / Unix machines
