CHI-DESIGN: “UP WE GO”.

The new center for architecture, design and education is a celebration of the American skyscraper. The skyscraper is in America a symbol for ‘The sky is the limit’. We wanted to reinterpret the traditional skyscraper built-up and bring it into the 21st century. We extracted the different elements of the skyscraper, such as the skin, core and interior spaces and refigured a alternative version. move the core to the edge for maximum floor efficiency and flexibility. Elevating the building to create an urban plaza & the roof receives a green roofdeck.

CONCEPT TEXT

The new center for architecture, design and education is a celebration of the American skyscraper. The skyscraper is in America a symbol for ‘The sky is the limit’. We wanted to reinterpret the traditional skyscraper built-up and bring it into the 21st century. We extracted the different elements of the skyscraper, such as the skin, core and interior spaces and refigured a alternative version. move the core to the edge for maximum floor efficiency and flexibility. Elevating the building to create an urban plaza & the roof receives a green roofdeck.
