

Salam Medical Center

Dr. Freddy Albaiady, Executive Director
Elqanatir Elkhairy, Egypt

Salam Medical Center is a registered not-for-profit organization dedicated to providing high quality medical care to all people, regardless of financial ability. SMC is a place where inter-religious peace is actively sought, health is restored and personal relationships are developed. The center is located in El Qanatir El Khairy, Egypt. Egypt is 90% Muslim and 10% Christian, so 90% of our patients are of the Muslim faith. Their interaction with SMC often is the only opportunity someone will have of sharing the love of Christ with them.

SMC provides medical assistance and health care to over 30,000 people. The Center has been successfully treating patients since it was opened 20 years ago in 1996. The journey wasn't easy, but with your help we managed to reach out to people from various religious groups, bringing them closer to each other and initiating a peace-building process. This process has fundamentally transformed relationships in the community, and has brought greater peace and stability to the area. This is especially critical in past years, given the additional instability that the country and region has faced recently. The economy of Egypt has suffered greatly causing inflation and prices more than doubling. Because of that many more people needing health care can not pay, making it more difficult for the clinic to serve these people, yet they turn no one away. And persecution of Christians is a growing concern and threat, yet we hold our faith true and rely on prayers for protection.

In 1997, SMC only had 13 staff members; today we have 52 There are now 17 departments serving patients 24/7: surgery, PT, radiology, ENT, obstetrics, dentistry and a pharmacy, among many other departments that all help us provide better service to our patients.

Now marking our 20th year, SMC is excited to be looking to the future by expanding our building with 2 more floors. This additional space will add 12 more beds, a new operating theater that will allow more operations, and better care for maternal deliveries. The total cost of this expansion is US\$241,645, but thanks to generous donors we have already received funding for one floor and furnishing!

Your support will also help us begin our new project - Peacebuilding Through Community Education, which will provide:

- Full prenatal care and education for expectant mothers, and care for newborns

- Additional Training and Upgrading for our nurses
- Free-of-cost treatment for Hepatitis C

Dr. Freddy Elbaiady, founder and CEO is a highly qualified consultant radiologist who has received training in Egypt, Holland and England. He regularly participates in a wide variety of international peace-related conferences. He is married with two sons.

Dr. Freddy Elbaiady
