

HAPPY SUMMER!

Congratulations on a strong finish to this school year.

Summer is a great time to relax and I want you to do lots of that! I also want to make sure that you don't suffer from the "summer brain drain". Practice makes perfect!

After a couple of weeks of rest, I would like you to begin practicing for your math adventure that will begin in September. You will be reviewing skills we tackled this year using an online Pre~Algebra book.

The goal is to spend 20 minutes a day, 3 days a week practicing skills. Start by completing a few of the 5-question quizzes for a chapter and when ready, complete a chapter test each week. Each chapter test will take approximately 20 minutes to complete. If you don't understand something, go back and review by clicking the "**Homework Video Tutor**" link. You should earn a 90 or above before moving to the next chapter. You may take the test as many times as you need to. The system will generate a new test each time you log in.

Keep track of your work and **BRING** in your tracking sheet on **Orientation Day** in September.

Please do NOT attempt to complete all the quizzes and tests in 2-3 sittings. The purpose is to practice a little bit all summer long. If you complete them all in June, you will be rusty in September. If you wait until the end of August, it will be stressful and defeat the purpose of practicing and staying sharp.

Bring in your tracking sheet on Orientation Day. This will count as extra credit toward our first chapter test and will give you a strong start to our new year of math!

Have a wonderful summer!
