

To help maintain math skills, a little practice can go a long way.

Consistent time blocks of 15 minutes per day are more beneficial than a few longer sessions. This year, I am suggesting CK-12 BrainFlex for arithmetic practice. This online site contains many subjects that students may enjoy exploring once they have practiced their math for the day. If they have forgotten a skill, the site contains visual and video explanations to remind them, including PLIX (check it out)-- but there is no expectation to learn new skills. Although I would encourage students to practice a variety of math topics that interest them, multiplication practice will be the most beneficial. Please focus on this skill for the majority of the time.

Please follow the directions from the website that are found below:

Hi there, I'd like you to join my CK-12 class:

2017/2018 Grade 6

Joining my class allows me to share content with you and keep track of how well you do on your CK-12 practice assignment. To join:

1. Go to [www.ck12.org](http://www.ck12.org).
2. Click join to create an account, or Sign in.
3. Click Groups.
4. Click join a Group.
5. Enter code: w4fyc You can also join the class by using this link:  
<https://www.ck12.org/join/group/?accessCode=w4fyc>

Students who have practiced 3 times per week for 6 of the summer weeks will receive a reward the first week of school, and will have the benefit of beginning school with a sense of preparedness. 😊

Blessings to all of you! I look forward to working with you this coming school year!

Love,  
Mrs. Cleveland
