THE ROLE OF CREATIVITY by WALT MUELLER, CPYU President (cpyu.org):

A couple months ago, CNBC ran an evening special report on how the pop singer known as Pitbull has achieved his fame and fortune. In fact, the special report was titled, "Pitbull: Fame and Fortune." In the show, the singer explains rather honestly that the blueprint for success in today's music industry is "ninety percent business" and "ten percent talent." Parents and youth workers, this is a reality we must talk about with our kids. Not only should we teach them to take note of how marketing efforts are used to get them to spend their money on music that lacks creativity, but we should talk about the role of creativity in God's plan for humanity. In the first chapters of Genesis, we read that God created humankind in His image. To be made in God's image means that we have been given the ability to create. In fact, all the good things God created have been given to us to in turn use to make things, including music. Teach your kids to glorify God by using their creative gifts to create with excellence.

Praying for you and your family...
