

# WATERMELON DRUM & WATERMELON HARP

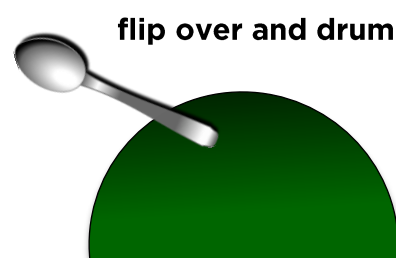

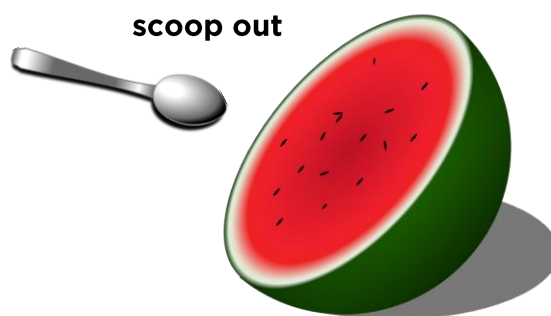

Musical craft instructions

## SUPPLIES:

- Watermelon (cut into two halves)
- Metal Spoon
- Rubber bands

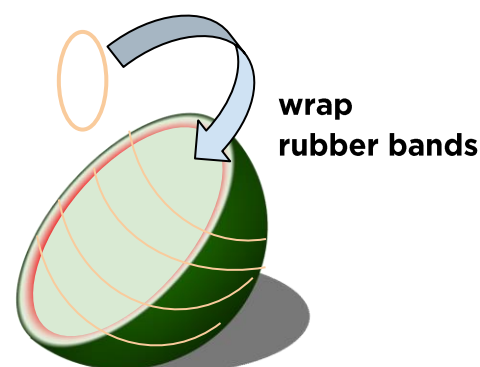

## WATERMELON DRUM DESIGN STEPS:

- Using a metal spoon, scoop out all of the watermelon's insides. This will leave you with a hollowed out watermelon, looking a lot like a cereal bowl! Do this to both halves.
- Celebrate your hard work by enjoying a nice watermelon snack. YUM!
- (Optional: freeze the hollowed out halves overnight to harden their shape)
- Once both halves are hollow, flip one half face down and use your spoon as a drumstick! Does it sound like a drum?

## WATERMELON HARP DESIGN STEPS:

- With the other half of your watermelon, take your rubber bands and stretch them around the melon, as shown.
- Once all of the rubber bands are placed around the melon, use your fingers to pluck them like Strings. Does it sound like a harp or guitar?

Have one person drum, while the other strums on your new, homemade instruments!
