

## **PANEL ON FINANCIAL MODELS FOR PHARMACIST-PROVIDED CARE: OPPORTUNITIES IN HEALTH CARE - A 21st Century Intelligent Health System**

**Wayne W. Oliver, JD**

An intelligent health system is one which focuses on saving lives and saving money for all Americans. The scientific advances in the 21st century provide the knowledge to make this possible. How can pharmacists be part of the solution for individual-centered, knowledge intensive health care delivery? In an outcome-focused health system operating with informed patient choice, where are the pharmacists? How can pharmacists benefit from incentives and other forms of compensation in a market-driven system involving increased financial transparency and accountability in health care?
