Execution factors	<p>The relative importance of the execution factors was determined by the following execution criteria:</p> <ul style="list-style-type: none"> • the characteristics of the Citadel Fund • the characteristics of the order (e.g. market or financing) • the characteristics of the financial instrument to which the order related (e.g. liquidity and transparency); and • the characteristics of the broker or trading venue/systematic internaliser/market maker/liquidity provider/ third country entity performing a similar function to which the order could be directed. 	<p>Given the liquidity of, and transparency for, these instruments the Firm considered price to be the most important execution factor when assessing quality of execution for market transactions.
