SMART WORKSHOPS

HOW TO GET YOUR SMART
CITY OFF THE GROUND

From our experience, we know that kicking off smart cities requires three things. This time-tested recipe reveals steps on how to successfully do this.

1

Creating the Right Environment

Smart cities by definition require a great deal of innovation: innovative technologies, processes, funding, even thinking. Over the years, we've developed specific processes on how to successfully create these environments in a repeatable fashion.

2

Cultivate Quality Knowledge

Most city problems are actually really easy to solve - once you know how. We bring specific and practical know-how, best practices and lessons passed down by people who have done it before.

Empower the Young & Enthusiastic

Smart cities improve our quality of life in sustainable ways, reduces costs, saves energy, even creates local businesses. Still, its success relies on a group of quality, enthusiastic, and knowledgeable people taking these massive tasks on. The good news is that every city has these amazing people, willing to dedicate their careers to making their city a better place for everyone. We help the community to come together and empower them, and just as they dedicate their lives to help their cities, our dedication is to help them. Over years we've learned a thing or two and will share it.

BONUS

KICKSTART YOUR SMART
CITY WITH A SINGLE EVENT

The CityOS events kick off with a smart city promotional campaign, followed by a conference, workshops, and a 48-hour smart city hackathon. These events kickstart and drastically accelerate smart city implementations within each city community.

This event results in:

SUPPORT

Support on all levels:
public, political, financial

ENGAGEMENT

Engagement of local
developers, engineers,
architects, etc.

KNOWLEDGE

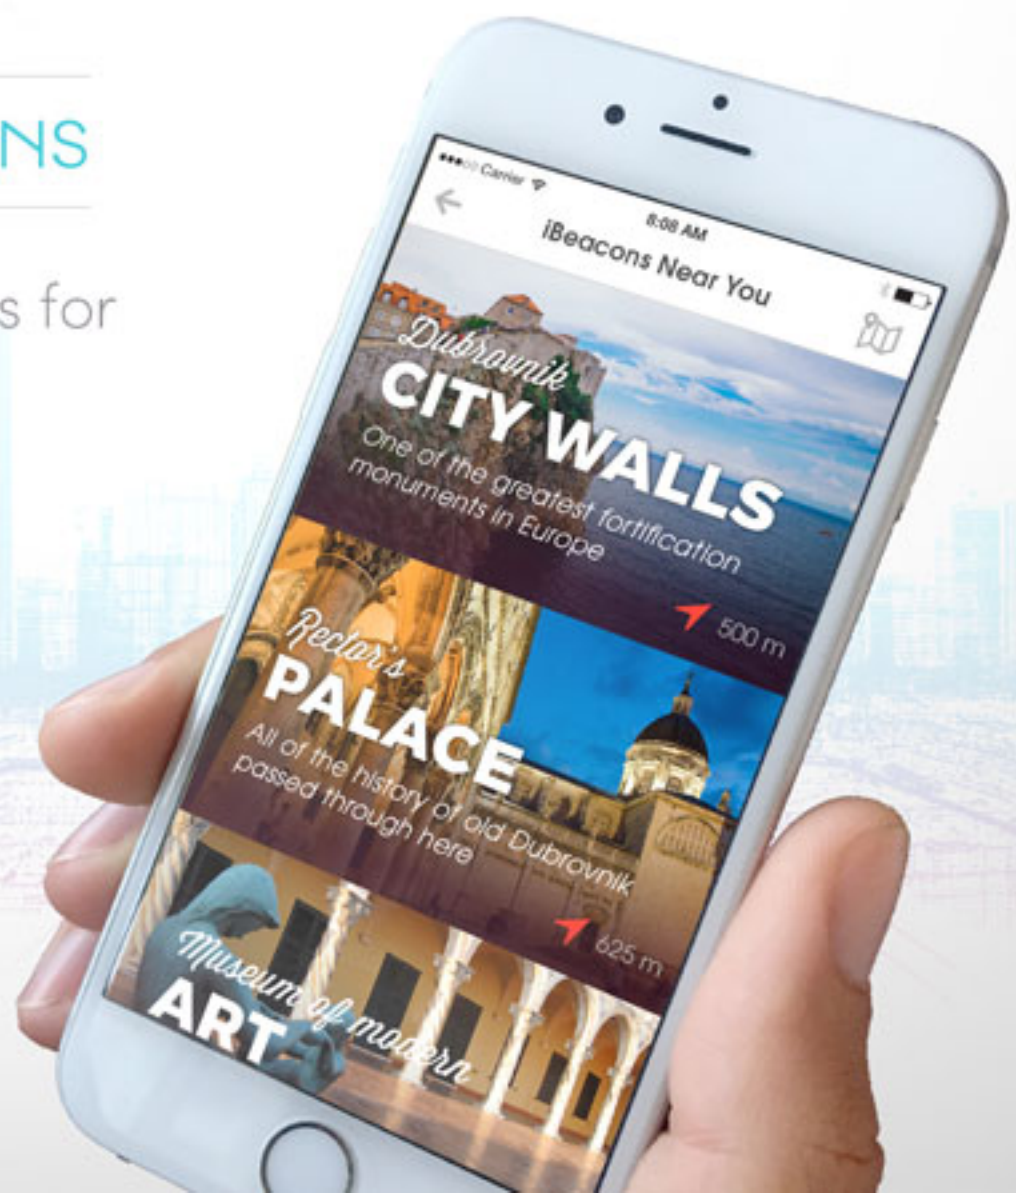

All necessary knowledge
to begin is available
within the city

ENTREPRENEURSHIP

New startups, small
businesses, employment
opportunities and a general
boost of entrepreneurship

READY SOLUTIONS

Pilots of real solutions for
local city problems
