Notes: Based on registered voters. Figures show combined 2018 and 2019 data. Don’t know responses not shown. Whites and blacks include only those who are not Hispanic; Hispanics are of any race. Source: Annual totals of Pew Research Center survey data (U.S. adults).

1. What are examples of demographics?

2. Organize which demographics that are more likely Republican and more likely Democratic in the chart below.
Chart 2: Nonwhites make up four-in-ten Democratic voters but fewer than a fifth of Republican voters.

3. What does the data show?

4. What trends and patterns can you identify from the data?

5. What could political parties learn from this data that would affect how they operate?
Chart 3: Share of Democratic voters with no college experience has fallen sharply; much less change among the GOP

6. What does the data show?

7. What trends and patterns can you identify from the data?

8. What could political parties learn from this data that would affect how they operate?
9. What does the data show?

10. What trends and patterns can you identify from the data?

11. What could political parties learn from this data that would affect how they operate?
12. Using the demographic data from the video clips and the charts, describe the trends and predictions for the Democratic and Republican Parties. How similar is this to what you see in your community?
