Intake → Scribing → QA → Coding

Clinician: Now, do you remember those 3 words I said earlier?

Patient: Sock, blue

Patient: What was the other one?

Clinician: It was a piece of furniture.|

What everyone is **saying** about Andy

I started using Andy and I immediately loved it. As a therapist, I was never comfortable typing in front of a patient. So I would take notes and do my charts at home. ***I hated my job, and Andy changed that.***

Stephanie Slone, PT

It's so great. I have been telling everyone I know about Andy. Because I only work PRN, being able to review my patients in Andy means I'm not going in blind, and it helps me feel a lot more confident in my charting.

Joanna Small, OT

It's easy, intuitive, and accurate. I like being able to upload everything easily, and see Andy's summary which saves me even more time once the chart is in the EMR for my final review.

Holly Hain, RN
