Roll-In Docks

WITH FLOE'S MODULAR DESIGN, CREATE YOUR PERFECT DOCK SYSTEM USING THESE STANDARD COMPONENTS

DOCK SECTIONS/SUNDECKS

These sections can be used for going straight out as well as making “L” shapes, slips or sundecks. Placing two 4' x 12' or 4' x 16' sections side by side gives you an excellent option for a double-wide sundeck that can be handled as two independent sections during installation and removal.

SHORE-END RAMPS

Adjustable, pivoting shore-end ramps give you the ultimate approach and additional length for less money.

DOCK SHOREWAY

Provides the flexibility of a shore end ramp with the look of a dock section. Can be used with or without wheel kits.

Also available: 5'x12', 5'x16', 6'x12' & 6'x16'

SUNDECKS

A 4' x 8' sundeck can be used on the side of a straight section to create an 8' x 8' sundeck. An 8' x 8' section used on the side of a straight section creates an 8' x 12' sundeck. 8' x 12' and 8' x 16' sections can be used either at the end of a straight section or off to the side to create a sundeck.

WEDGES

Make that perfect corner while adding safety and beauty to your system. Wedges are available in 2', 4' and 6'.

WHEEL KIT WEIGHTS/PAIR

SHALLOW	16 lbs
MEDIUM	25 lbs
DEEP	29 lbs
