# Dynamics **Mobile**

solution for

Dynamics Mobile is a highly customizable mobile platform for Microsoft Dynamics, designed to facilitate business operations on the go. Empowered by a cutting-edge technology, the solution is capable of handling all activities and business logic in a complete offline mode.

REAL OFFLINE mode

Real offline mode

Dynamics Mobile uses an advanced technology replicating and enforcing all the business logic from Microsoft Dynamics on smartphones, tablets, handhelds, badges and other mobile devices. This allows employees to perform all operations in either online, or offline mode, regardless of their current Internet connectivity status.

Synchronization with the ERP occurs automatically, once 3G, Wi-Fi or other network coverage is present.

Ready-to-use modules

For some of the most common business activities, there are pre-defined functionalities that you can start using right away:

Field Sales	Warehouse and Inventory Management	Approvals (AX only)	Geo Services

And the implementation is fast and easy - setting up a standard functionality takes only a couple of days.

Unlimited customization capabilities

Dynamics Mobile allows you to easily create and modify:

- Business logic
- Modules and functionality
- Data
- Screens and layouts
- Reports
- Peripheral devices
- Languages
- User rights, and more

Peripherals & built-in features

Dynamics Mobile allows you to fully utilize mobile and ERP-connected printers, barcode scanners, cameras, NFC chips and any other peripheral or built-in feature. What is more, it supports signature and image capturing, route rendering and geo-location tracking.

Geo Location Reporting

Dynamics Mobile provides out of the box geo-location and geo-fencing enabled capabilities, allowing supervisors to analyze the mobile fleet performance over the world map. It includes analysis of the performance against the planned sales route, area coverage and many others. The activities of the mobile fleet can be monitored in real time or analyzed for past period easily from any place in the world, regardless of the actual ERP platform.

OTA management and updates

The product solves various technical challenges, such as device management, software deployment, updates, data synchronization, monitoring, and more, by converting them into remote, single-click activities. With our OTA (over-the-air) technology, mobile users stay focused on their tasks, without any need to bring the devices back to the office.

Plenty of Dynamics versions

- Microsoft Dynamics 365 Enterprise edition
- Microsoft Dynamics AX 2009 to AX (7)
- Microsoft Dynamics NAV 4 to 2016

As a stand-alone solution, the mobile platform can be connected to any other Microsoft Dynamics product.

Multiple mobile platforms

Dynamics Mobile comes with a native application (online and offline modes) for:

- Windows 8.1 and higher
- Windows phone 8.1 and higher
- Android 5.0 and higher
- iOS 9 and higher
