

Dynamics Mobile

solution for

Dynamics Mobile is a highly customizable mobile platform for Microsoft Dynamics, designed to facilitate business operations on the go. Empowered by a cutting-edge technology, the solution is capable of handling all activities and business logic in a complete offline mode.

Ready-to-use modules

For some of the most common business activities, there are pre-defined functionalities that you can start using right away:

Field Sales

Warehouse and
Inventory Management

Approvals
(AX only)

Geo Services

- Receiving and shipping of goods
- Picking and put-away
- Multi-company support
- Multi-warehouse support
- Ad-hoc movement of goods within a warehouse
- Ad-hoc transfers between warehouses
- Planned movement of goods within a warehouse
- Planned transfers between warehouses
- Physical inventory control
- Support for bins, lots and serials
- Printing
- Barcode scanners support
- Call integration
- Email integration
- Signature capturing
- Image capturing

And the implementation is fast and easy - setting up a standard functionality takes only a couple of days.
