

# Dynamics Mobile

solution for

Dynamics Mobile is a highly customizable mobile platform for Microsoft Dynamics, designed to facilitate business operations on the go. Empowered by a cutting-edge technology, the solution is capable of handling all activities and business logic in a complete offline mode.

## Ready-to-use apps

For some of the most common business activities, there are pre-defined functionalities that you can start using right away:

Field Sales

Warehouse and  
Inventory Management

Approvals  
(AX only)

Geo-Services

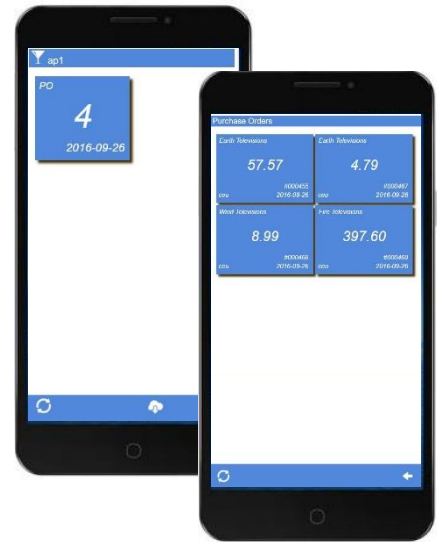

- Working with PO and other documents
- Displaying document details
- Viewing document attachments on device
- Rejecting and Approving
- Support for custom approval actions
- Push notifications for new documents for approval
- Viewing and providing comments

And the implementation is fast and easy - setting up a standard functionality takes only a couple of days.

## Solution highlights

- Multi-platform support (iOS, Android, Windows)
- Bi-directional data synchronization between the mobile app and AX
- Mobile device geo-location tracking and geo-fencing capabilities
- Seamless AX business logic integration
- Multiple mobile apps in single deployment
- Unlimited customization capability
- Multi-language support
- Remote device management
- On-premises or in the Cloud

## Dynamics versions Supported

- Microsoft Dynamics 365 Enterprise edition
- Microsoft Dynamics AX (7)
- Microsoft Dynamics AX 2012

## Multiple mobile platforms

Dynamics Mobile comes with a native application (online and offline modes) for:

- Windows 8.1 and higher
- Windows phone 8.1 and higher
- Android 5.0 and higher
- iOS 9 and higher
