# FATALITY ANALYSIS REPORTING SYSTEM (FARS)

2003 Codebook - Version 07Jul04

## Introduction

This codebook documents data sets describing motor vehicle accidents involving fatal injuries that occurred in the United States during the calendar year of 2003. This dataset is labeled version 07Jul04 of the 2003 file and is the final reported version. The data sets were developed by the Transportation Data Center from data supplied by the National Highway Traffic Safety Administration (NHTSA) and collected through NHTSA's Fatality Analysis Reporting System (FARS). The cooperation of NHTSA in providing the data is gratefully acknowledged.

FARS is a computerized data base maintained by NHTSA that contains information on fatal motor vehicle traffic accidents occurring in the fifty states and the District of Columbia. Each accident in FARS includes at least one fatality that happened on a trafficway. The data for FARS are provided by the states and reported in a standard format.

The data obtained from NHTSA have been reformatted into five distinct data sets for use with the Data Center's Accident Data Access and Analysis System. The characteristics of the system data sets are given in the table below. Relational data sets for the five record types with extensions made by the Data Center are maintained, however, and other final data set configurations can be generated.

The information used to generate the data sets described in the table represents NHTSA's Version 07Jul04 of the 2003 FARS. The copy was made in July 2004.

In the following codebook, code categories found with no label indicate code values that do not have a valid value in the NHTSA supplied documentation.

The codebook itself is divided into four sections that document the accident, vehicle, occupant, and nonmotorist records respectively. Univariate frequencies and frequency percentages displayed in each section are from the corresponding data set. For example, frequencies for the vehicle variables (101-166) are derived from FARS03VH.

2003 FARS DATA SETS  
Version 07Jul04

Data Set	KEY	Variables	Cases
Accident	FARS03AC	1-62	38,252
Vehicle	FARS03VH	1-62, 101-166, 201-234	58,512
Occupant	FARS03OC	1-62, 101-166, 201-234, 301-346	94,807
Two Vehicle	FARS03TV	1-62, 101-166, 201-234, 301-346, 1001-1066, 2001-2034, 3001-3046	13,960
NonMotorist	FARS03NM	1-62, 101-166, 201-234, 301-346, 401-446	6,350

Nonmotorist records are documented in a separate data set. The vehicle variables in this data set contain information on the vehicle in the accident that was associated with the nonmotorist. The driver and occupant variables describe the driver of the associated vehicle and the occupant information for the driver.

The two-vehicle-accident data set contains one record for every accident involving two vehicles. This record documents accident information as well as vehicle, driver, and occupant (for the driver) information for each of the two involved

vehicles. In order to avoid a large amount of duplication, the two-vehicle file is not documented directly in this codebook. Univariate frequencies are consequently not available. Variable numbers for the data set are as follows:

V1 - V62 - Accident  
V101 - V166 - Vehicle Number 1  
V201 - V234 - Driver of Vehicle #1  
V301 - V346 - Occupant information for Driver #1  
V1001 - V1066 - Vehicle #2  
V2001 - V2034 - Driver of Vehicle #2  
V3001 - V3046 - Occupant information for Driver #2

The codebook may be used for the definition of variables V1 through V346. Variables V1001 - V1066 have the same definition as V101 - V166, variables V2001 - V2034 have the same definition as V201 - V234, and variables V3001 - V3046 have the same definition as V301 - V346.

While every effort has been made to provide accurate, reliable data, inconsistencies may arise from the source data or from the reformatting procedures used. Consequently, the Data Center cannot guarantee the accuracy of the data but will try to correct any discrepancies that are found. Please notify the Center of any errors or data inconsistencies that are uncovered as well as any suggestions or comments that you may have concerning the codebook by calling (734) 763-3230 or by emailing TDC-UMTRI@umich.edu.

Before 2003, the policy was not to submit a Person Level form for uninjured occupants of van-based buses. Beginning in 2003, a person level form is submitted for all occupants of van-based vehicles, including van-based buses.

Use Code "51" for passengers in the 5th row seats of a 15-seat, 5-row van. Always use Code "51" for injured bus passengers in full-size buses.
