STATE OF TEXAS
1997 MOTOR VEHICLE ACCIDENT CODEBOOK

INTRODUCTION

This code book documents data sets describing motor vehicle accidents that occurred in the State of Texas during calendar year 1997. The data sets were developed by the Transportation Data Center at the University of Michigan's Transportation Research Institute from data supplied by the Texas Department of Public Safety. The cooperation of that agency is gratefully acknowledged.

Three separate data set categories have been built from the original data supplied by the state of Texas.

- 1) All accidents in which at least one truck was involved. Large trucks were defined by code values 04-08 for variable 106 and code values 20-27, 31-34, 36, 39, and 99 for variable 104 as described in the codebook.
- 2) All accidents in which at least one pedestrian or pedalcyclist was involved.
- 3) A census file of all accidents in the calendar year.

The table below provides summary information for each of the categories (such as the "key" that provides access in ADAAS).

The data sets making up the Census, and Large Truck categories have three distinct formats: an Accident data set, a Vehicle data set, and an Occupant data set.

- 1) The Accident data set (described by variables 1-45) includes one record for each accident. General accident information not specific to any vehicle or its occupants is found in this data set (e.g., time of day, accident type, etc.).

1997 TEXAS DATA SETS

CATEGORY	KEY	VARIABLES	CASES
Census	TXC97ACC	1-45	305,989
	TXC97VEH	1-45, 101-125	562,407
	TXC97OCC	1-45, 101-125, 201-217	765,506
Ped/Cyclist	TXC97PED	1-45, 101-125, 201-217, 301-314	8,857
Large Truck	TXT97ACC	1-45	62,879
	TXT97VEH	1-45, 101-125	128,220
	TXT97OCC	1-45, 101-125, 201-217	170,650

- 2) The Vehicle data set (described by variables 1-45, and 101-125) includes one record for every vehicle involved in the accident. Variables 101-125 describe specific characteristics of the vehicle, while 1-45 repeat the accident description.
- 3) The Occupant data set (described by variables 1-45, 101-125, and 201-217) includes one record for every occupant involved in the accident. Variables 201-217 describe specific characteristics of the vehicle occupants, while 1-45 and 101-125 repeat the accident and vehicle descriptions.

The separate Pedestrian/cyclist data set is described by variables 1-45, 101-125, 201-217, and 301-314. It includes one record for every pedestrian or pedalcyclist involved in the accident. Variables 301-314 describe specific characteristics of the pedestrian/pedalcyclist, while 1-45 describe the accident, 101-125 describe the associated vehicle, and 201-217 describe the associated vehicle's driver.

UMTRI has received the commercial-vehicle data along with the standard crash data file. At this time this data has not been incorporated into the 1997 system datasets. There are 16,882 commercial-vehicle records for 1997. Users wishing access to this information should contact the TDC.

This codebook documents the variable names and code values for all data sets and gives the univariate frequencies for the Census and Truck data sets. In using the univariate frequencies, the following convention should be noted: frequencies for variables 1-45 were derived from the two Accident data sets, frequencies for variables 101-125 were derived from the two Vehicle data sets, and frequencies for variables 201-217 were derived from the two Occupant data sets. Frequencies for variables 301-314 were derived from the Pedestrian/cyclist data set.

Starting with the 1985 Texas data, all occupants involved in the accident who are in a passenger car or truck have an occupant record. Prior to 1985 only occupants in an injury accident or in a vehicle with a damage rating over 5 were coded. It has also come to our attention that the variable Total Passengers in Vehicle (V117) counted only the occupants with a subsequent record. Thus property damage accidents will be associated with an underreporting of occupants.

While every effort has been made to provide accurate, reliable data, inconsistencies may arise from the source data or from the reformatting procedures used. Consequently, UMTRI cannot guarantee the accuracy of the data but will try to correct any discrepancies that are found. Any comments or suggestions concerning the data or the codebook may be made by calling the Transportation Data Center at (734) 763-3230.

Variable 29	OBJECT STRUCK	Width: 2	Type: Numeric
		Dec: None	Miss: 99

This Variable, used in conjunction with Variable 26 (FIRST HARMFUL EVENT) and Variable 28 (VEHICLE MOVEMENTS) provides a more detailed picture of the accident. It may indicate either the first or second impact or collision, depending on the first harmful event. For example, if Variable 26 shows a collision with a fixed object, then the code value here would indicate the first impact. If Variable 26 shows a collision between two vehicles, then the code value here may indicate a second impact, or may be used to show vehicle movement.

The VEHICLE Variables

Variables 101 through 125 describe the vehicles involved in the accident. They are included in the Vehicle, Occupant, and Ped/cyclist data sets. The Vehicle data set includes these variables, along with the accident variables on a vehicle level.

NOTE: Information has been coded only for those vehicles involved in the first harmful event, unless casualties occur in vehicles other than these, then, information concerning such vehicles has also been coded.
