

# FCPX Shortcuts

## We Use All the Time

### In the Event Viewer

**Command-I** - *Import*

**Space** or **L** - *Play*

**LL** - *Play 2x speed*

**J** - *Play in reverse*

**Space** or **K** - *Stop*

**I** - set *In* point

**O** - set *Out* point

**F** - *favorite* the selected part of a clip

**Q** - *add* selected clip onto timeline, wherever playhead is

**Command-K** - add *keyword* to selected clip

### In the Project Timeline

**A** - *Select* tool

**T** - *Trim* tool

**B** - *Blade* tool

**R** - *Range* tool

**N** - toggle *Snapping* on and off

**S** - toggle *Skimming* on and off

**V** - *hide* selected clip (both video and audio)

**Command-B** - *blade* the selected clip at playhead

**Command-plus** - *Zoom* in

**Command-minus** - *Zoom* out

**Command-R** - Change clip *speed*

**Command-mouse** - precise *volume* adjustments

**Comma, Period** - move one frame at a time (in Trim tool, select either beginnnig or end of clip, use period or comma to trim precisely)

**Option-W** - *Add Gap*

**Option-S** - *Solo* selected clips

**Command-C** - *Copy*

**Command-V** - *Paste*

**Option-V** - *Attach* copied clip above storyline, rather than into storyline

**Shift-Command-V** - paste another clip's *attributes* (super easy for applying color, audio, effects, etc to many clips at once).
