

EXTRA TIPS

1. Use instrumental music tracks with your aerial videos. A good music track can pair greatly with the visuals on screen. For an extra effect you can edit your cuts to match the stronger beats of the music.

Here are some of my recommended Tracks from [Audio Jungle](#):

[How Alive Are You](#)

[Electronic](#)

[Uplifting House](#)

[Air](#)

[Indie Electronic](#)

2. Third-party After Effects plugins can really help take your color grading to the next level.

Here is a list of my “Go-To” After Effects plugins:

[Magic Bullet Colorista](#)

[FilmConvert](#)

[Koji Advance](#)

3. [Vision-Color](#) is a great resource if you are interested in third-party LUTs for Color Grading.

4. You can also use Red Giant’s [LUT Buddy](#) to create your own LUTs and reuse them in your own projects.

5. You can use the LUTs I created in the Projects Files on your own Personal and Commercial projects.

6. Please only use the example clips included in the Project Files to follow along with this course and **not in your own personal or commercial projects.**

Thanks again & I hope you enjoyed this course!
